

BERETTA

At the core of Beretta is a passion.

An understanding of the wild places. The cold fields of autumn.

The high grass and the low marsh. Rain and sun. Man and dog.

It's an understanding that is pure and real.

It lives in the deepest reaches of the hunter's heart.

The innermost corners of the shooter's soul.

And it is everywhere.

A field in Tuscany. A lake in Wyoming. The flash of a tail. The thunder of wings.

And then there is the stirring. The relentless search for balance.

Between what has gone before and wha t is yet to be.

Between then and now and tomorrow.

This is the passion that drives Beretta. It's in our genes.

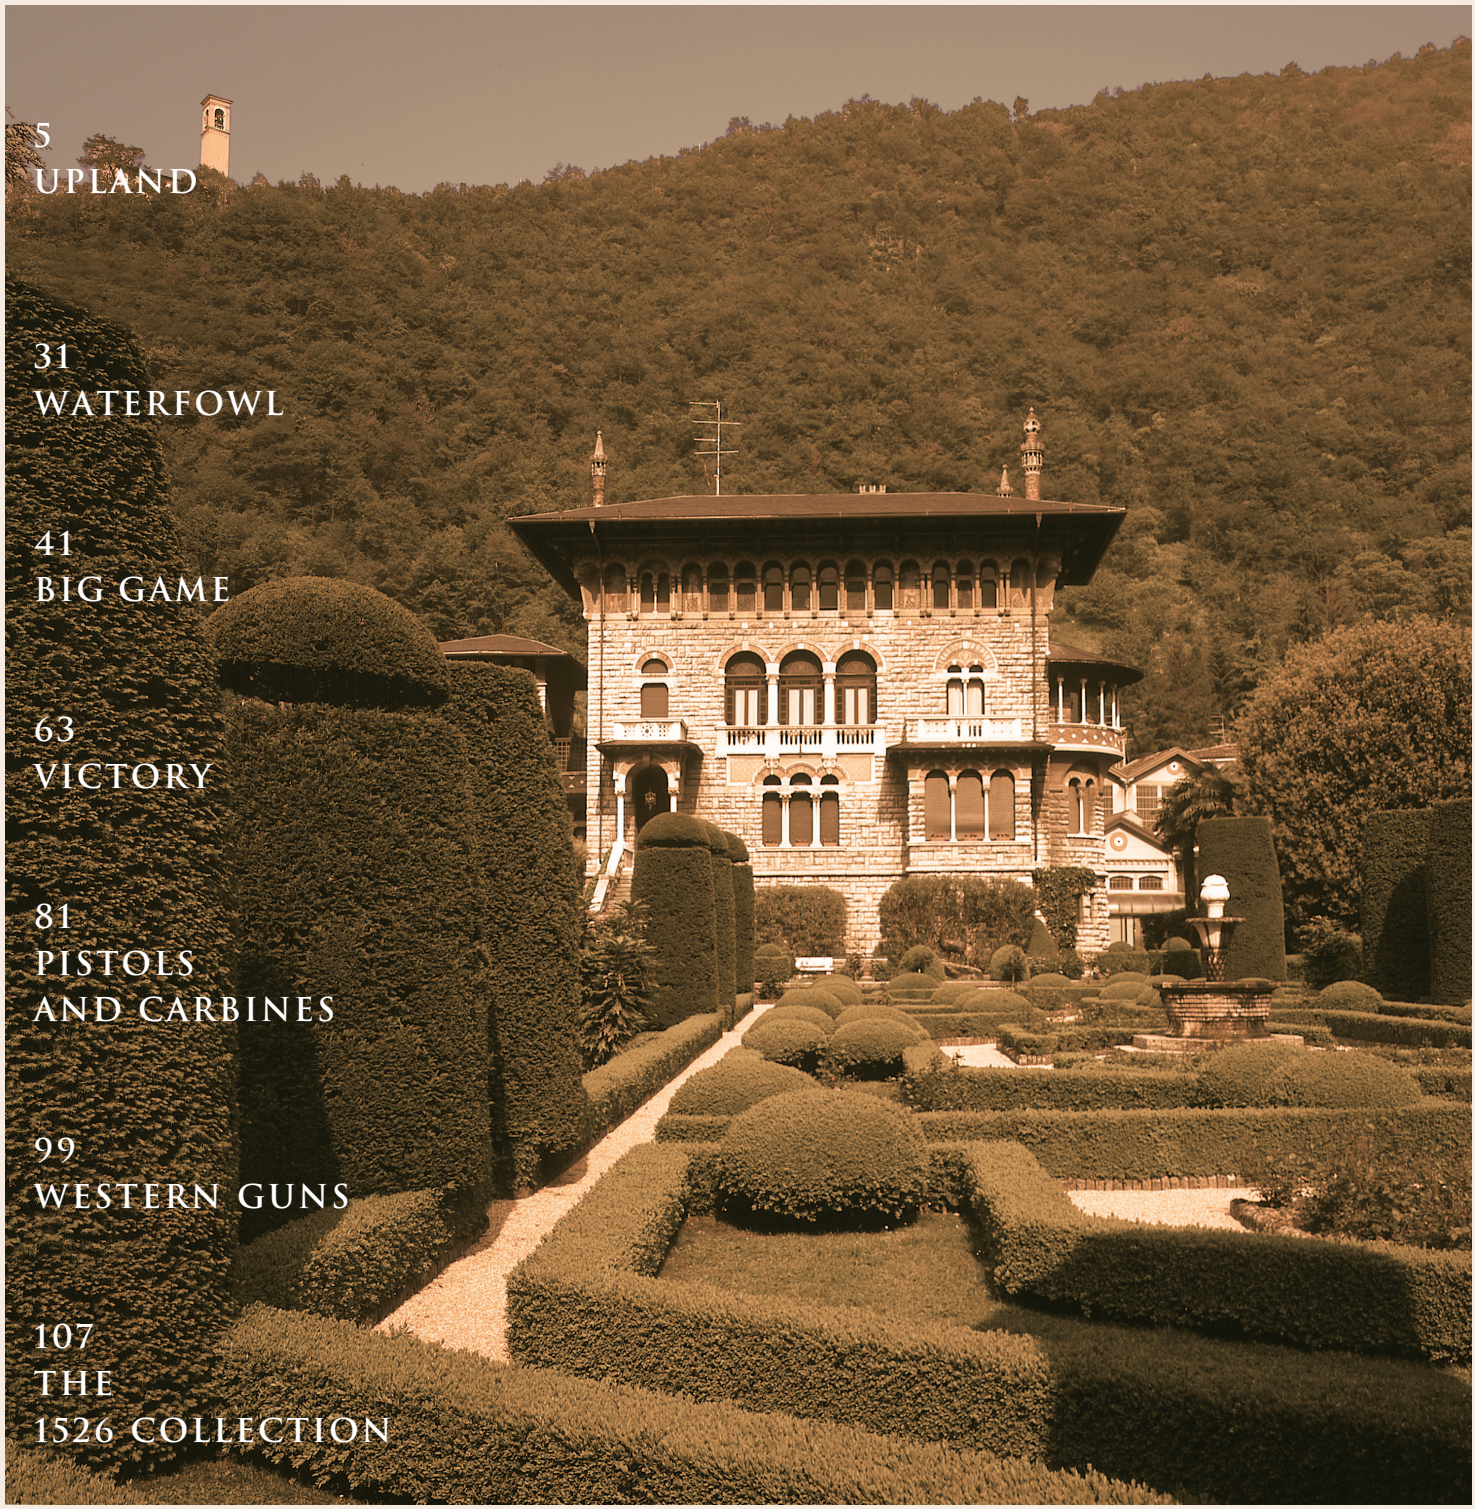

And so, too, is it in our hearts. It's why we exist.

And it's why we have endured for nearly 500 years.

Because of one purpose. One passion.

Fabbrica d'Armi Pietro Beretta S.p.A.
Via Pietro Beretta, 18
25063 Gardone Val Trompia
Brescia, Italy

Dear Friends,
Welcome to the 2008 Beretta Annual. It is with great pleasure that I introduce this book and the family of Beretta products that showcase our unwavering commitment to master craftsmanship, absolute reliability, and industry-leading innovation. In a year in which we once again expect to see Beretta firearms accompany the world's best shooters atop the Olympic medal stand, you will see that we have not for a moment rested on our laurels. We continue to be driven to bring you newer and better firearms, and the accessories that accompany them.

You see, we have a passion for everything that we do. You can see it in the details of our products and in our commitment to our customers. It is not enough to make the best firearms; we must also respond to our customers' needs and provide them with everything it takes for them to pursue their passions.

We are more committed than ever to the sporting life. In these pages you will find products that are a true reflection of who we are. We live, love, and believe in what we do. Just like you, the Beretta family's outdoor pursuits are wide ranging: upland, big game, waterfowl, competition shooting, Western and more. Because of this, we are committed to bringing you all-inclusive collections of firearms, apparel, and accessories — designed to complement each other and suit each individual's particular need.

Cav. Ugo Gussalli Beretta
President, Fabbrica d'Armi Pietro Beretta S.p.A.

INTRODUCING
UPLAND

Whether it's aspens and alders that hide the darting flight of woodcock and grouse — or the open grass plains of pheasant and quail — you are in your element. The crisp fall morning air heightens your senses as the sun warms your face. You once again marvel at the gracefulness of your trusty German Shorthair at rock-solid point. It is a scene you've both played out many times before. Yet it feels as fresh and exhilarating as the first time you swung your shotgun towards the skies. No matter the day's result, this is reward enough.

These moments are what bring you back season after season. A respect for nature, harmony, and heritage are the hallmarks of the Beretta Upland sportsman. Hallmarks that are reflected in Beretta's superb collection of fine shotguns perfectly suited for their purpose in the field, superior upland apparel designed to meet the challenges of nature, and accessories that perfectly complement your passion and pursuit.

SV10 PERENNIA III

SV10 PERENNIA. IDEAL BLEND OF TRADITION, DESIGN, FUNCTION AND STYLE

In a traditional firearm like the over-and-under, the task of the designer is even more difficult. The design is constrained by the dimensions, the function of the parts, by the weight and balance of the components, by the ergonomics of the shapes, by tradition. The new Beretta Perennia over-and-under is the best example of how all of these characteristics may be blended together in the correct proportions in order to reach a single goal, a grand result of elegance, modernism, efficiency and style.

The receiver, while maintaining the traditional Beretta locking system with trapezoidal shoulders and double longitudinal locking lugs, is strongly characterized by the sideplates that stand out from the sides in an arrow-head shape. The locking shoulders of the monobloc and their corresponding seats on the receiver feature new and increased shapes that are not only better integrated into the design of the sideplates, but also improve the efficiency of the lock-up. The styling refinements continue into the shape of the stock inletting, which now moves well forward into the sides of the receiver, consolidating the rigidity of the assembly.
The new profile of the barrels also unifies form and function: the tubes elegantly blend with the receiver and ensure excellent strength and durability. The top moldings are gracefully modeled in harmony with the style of the receiver and simultaneously guarantee an improved field of view when sighting.

Machined from a solid steel alloy billet, hardened and tempered, the receiver of the Perennia over-and-under provides a low and elegant profile that allows the redirection of the recoil in-line to the shooter's shoulder. The felt recoil is therefore reduced and the ease of shouldering increased. The high-strength alloy receiver is treated with an exclusive, nickel based, protective finish that increases its durability and resistance to the corrosive elements of the environment.

The newly designed top lever features a wide surface area to ensure ease and comfort of operation.

DESIGNED TO PERFORM

THE REVOLUTIONARY SV10 PERENNIA

SV10 PERENNIA

The strong trigger guard, machined from a single piece of steel, elegantly blends into the trigger plate via two rounded reinforcement ridges. Even in this case form and function are wisely intertwined.
Exclusive prerogative of the most prized shotguns, the trigger of the Beretta Perennia is formed from solid, lightweight titanium. This premiere material guarantees the durability and reliability of use, even in the most difficult hunting conditions. The mirror polish highlights the harmony of its shapes.
The new fore-end lever, with its elongated shape, ensures the smooth release of the fore-end from the barrel and a touch of additional elegance.

OPTIMA BORE HP

EXCLUSIVE HIGH AND "ENVIRONMENTALLY FRIENDLY" PERFORMANCE

Manufactured from the highest strength alloys using the exclusive process of cold hammer forging, which guarantees the perfect concentricity of the tubes, the barrels of the new Beretta Perennia are extremely strong yet, at the same time, light. Designed to be able to withstand the rigors of steel shot, they feature a new internal Optima-Bore® HP (High Performance) profile with a longer forcing cone which improves patterning and contributes to reduce felt recoil. The bore and chamber are completely chrome lined to guarantee maximum resistance to corrosion and wear, and to increase the velocity of the shot. The new profile of the barrels joins form and function: the tubes blend harmoniously with the monobloc, mating the streamlined profile of the receiver and, at the same time, ensuring excellent durability and strength.
The external surfaces of the barrels are finished in a resistant polished blueing.

The new flush Beretta Optimachoke® HP (High Performance) choke tubes, with lengthened taper, feature an internal profile to reduce friction, improve the density and distribution of the pattern. Manufactured from high strength steel and finished in a nickel-alloy coating, the Beretta Optimachoke® HP chokes guarantee significant corrosion resistance and ability to withstand the rigors of steel shot.

The newly designed extractors are precisely guided along the entire length of the barrel monobloc to ensure impeccable extraction and ejection of the shells. The large contact surface area of the extractors on the rim of the shell improves its retention and reliability.
In the new Perennia over-and-under, Beretta introduces a new patented extraction system that allows the selection between automatic ejection or simple mechanical extraction of the fired shells. The latter, "environmentally friendly" mode, allows the easy removal of the shells from their chambers. The selector is easily accessed by simply removing the fore-end.

Well proportioned yet characterized by a significant size, the hinge pins, also thanks to a new special internal reinforcement shoulder, offer the maximum resistance to the stress of years of use. Positioned as close as possible to the lower barrel axis, the pins allow the compactness, elegance and strength of the receiver.

SV10 PERENNIA III

INNOVATIVE TECHNICAL REFINEMENTS, EXCEPTIONAL SHOOTING COMFORT

The new profile Q-Stock® features an exclusive attachment system to the receiver, patented by Beretta, which allows its disassembly in just a few seconds – for replacement, special work or access to the trigger mechanism – without having to remove the recoil pad. This new Q-Stock® design no longer requires the traditional internal through-bolt since it attaches directly to the receiver, increasing the solidity of the receiver-stock assembly. The result is a lock-up that is constant over time, also contributing to extending the life of the shotgun. The disassembly operation is executed using the included special key, inserting it through the grip cap which features an elegant and functional hinged coverplate. Once the stock is removed, even the trigger group may be quickly removed in order to have access to all of its components for cleaning or maintenance. The disassembly may be performed with the same tool used to detach the stock.

SV10 PERENNIA III

The design of the safety/selector assembly has been executed with attention to the smallest detail to ensure smooth, precise and secure operation and a constant engagement force. The selector (where present) is integrated into the lever and snaps precisely into one position or the other, avoiding the annoyance of being in a non-firing 'neutral' position and compromising the shot.

The fore-end, streamlined and elegant, features new ergonomic shapes that guarantee its optimal grip. The new fore-end iron boasts a new patented internal mechanism that maintains a constant barrel-receiver-iron fit. This system further contributes to improve the strength of the locking system and the service life of the gun.

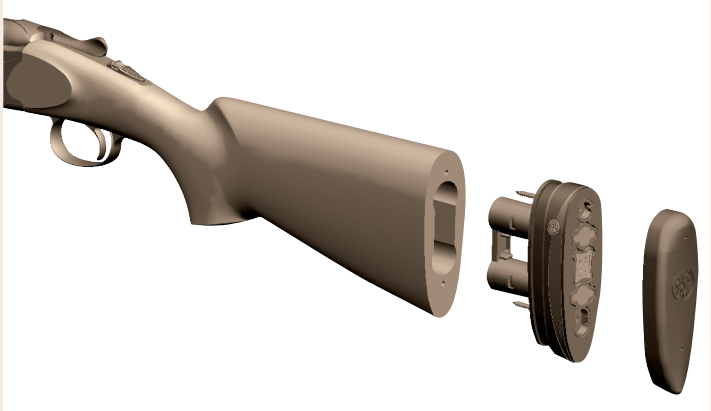

NEW FORE-END AND FORE-END IRON

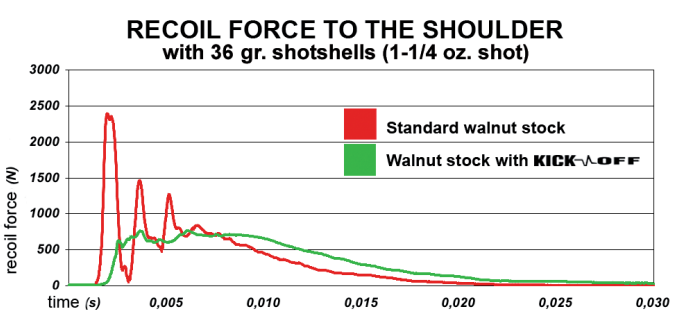

The new patented Kick-Off® mechanism (on select models only) was conceived to significantly reduce the felt recoil to the shooter's shoulder. Thanks to Kick-Off®, the recoil energy is gradually dissipated through two oil hydraulic dampeners integrated into the design, with obvious better comfort to the shooter. At the same time, the vibrations and the muzzle rise are decreased, and the durability, reliability and handling of the firearm are enhanced.

471 EL, SILVER HAWK

471 EL

Combining half a millennium's worth of design skill and craftsmanship with state-of-the-art technology, the classic side-by-side 471 EL is a hunting arm that is both beautiful and rugged. Its lines and finishes recall the best of a bygone era. The classic English-style buttstock and splinter fore-end are made of oil-finished select walnut. Case-hardened sideplates with Beretta's unique coloring process are decorated with eye-catching gold-filled game bird scenes.

471 SILVER HAWK

Extensive scroll and floral engraving and a gold-filled hawk's head on the top lever make the 471 Silver Hawk a prestige item you'll be proud to carry in any company. Just like the 471 EL, this side-by-side's receiver is made of a steel alloy rich in nickel, chromium and molybdenum for durability and beauty. Both shotguns feature barrels joined to the monoblock by a laser system that creates the strong, secure Beretta barrel assembly.

The 12-gauge Optimachoke® tubes feature longer tapered construction, assuring greater pellet concentration and better distribution of shot.

The sideplates are attached without visible screws, for a classic understated look.

687 EELL DIAMOND PIGEON

687 EELL DIAMOND PIGEON

In Italian, EL stands for extra lusso (extra luxury). The EELL designation takes that quality to an even higher level. This is an over-under with the feel and allure of a classic game gun for the discriminating sportsman who appreciates all the finer points of a well-made shotgun. The patented locking system creates a particularly slim receiver, making it one of the most elegant, finely balanced and responsive shotguns in the world. The extensive hand-chased engraving, floral or game scenes, combined with the highly figured oil-finished walnut, makes a classic statement of your good taste. The 687 EELL Diamond Pigeon is also available in 20/28 gauge Combo set.

The sideplate design gives the engraver full scope for his craft. When combined with fine walnut, nothing is quite so pleasing.

687 EL GOLD PIGEON II

687 EL GOLD PIGEON II

Striking figured walnut and distinctive engraving make the 687 EL Gold Pigeon II a luxurious hunting arm that will satisfy your need for a personalized field shotgun. The exceptionally strong, reliable, low-profile receiver is enhanced with deep relief engravings. The stocks and fore-ends are cut from superior quality walnut and built to withstand a lifetime of use and to guarantee a perfect balance and quick target acquisition. This is a gun that will be the companion of a lifetime. Also available in 20/28 gauge combo set.

"WE HAVE MANY BERETTA SEMI-AUTOMATIC SHOTGUNS THAT HAVE WELL IN EXCESS OF 300,000 ROUNDS OF AMMO FIRED THROUGH THEM. IN FACT, WE HAVE AN ONYX O/U SHOTGUN (SHOWN ABOVE) THAT HAS MORE THAN A HALF MILLION DOCUMENTED ROUNDS OF AMMO FIRED THROUGH IT...AND IS STILL GOING STRONG. IN OUR BUSINESS WE DON'T HAVE TIME TO MESS WITH PRODUCTS THAT DON'T PERFORM."

— Zeke Hayes, *Trek Safaris, www.treksafaris.com*

687 SILVER PIGEON

687 SILVER PIGEON V

The pinnacle of the Silver Pigeon line, this prestigious over-under is stocked in richly figured, oil-finished walnut and detailed with gold game bird inlays and a Beretta gold medallion underneath. The receiver is treated with Beretta's proprietary process that imparts a classic color-case finish that ensures metallurgical integrity and a distortion-free part. A joy to own and shoot, thanks to Beretta's superior mechanical refinement and innovative technology, the Silver Pigeon V will last for generations.

687 SILVER PIGEON IV

Beretta shotguns are carried with pride on every continent. The 687 Silver Pigeon IV is expressly styled to satisfy those who desire a classic blued finish. In contrast to most Beretta over-unders, it has a rich, classic black frame, accented by "gold" inlays that reflect the typical quarry for each gauge. It's a striking gun that stands out—even among other Berettas.

687 SILVER PIGEON III

There's no need to sacrifice style for function with this attractively priced member of the Silver Pigeon family. The distinctive 687 Silver Pigeon III has all the features of the S and II, but with more extensive engraving, including game scenes, on the frame. Available in a trim and racy 28 gauge made on its own properly scaled frame, this finely crafted shotgun with natural pointability is up to any hunting challenge.

687 SILVER PIGEON

687 SILVER PIGEON II

Designed to perform, the Silver Pigeon II is also as beautiful to the eye as it is to the touch. The oil-finished stock is select walnut with a traditional Schnabel fore-end; bold game scene engraving separates it from other shotguns. This over-under also enjoys the Beretta's legendary pointability, thanks to the 680 series low-profile receiver. Furthermore, the absolute strength of the unique locking system provides for years of trouble-free use. Also available in 20/28 gauge combo set.

687 SILVER PIGEON C

Add a bit more distinction to your shotgun with the 687 Silver Pigeon C. Developed to fulfill the needs of British shooters for an over-under with all the performance features of the Silver Pigeon line, but with an upgraded finish. This model sports a color case-hardened finish on the receiver and higher grade wood. In every other respect, the Silver Pigeon C offers all the design technology that makes Beretta over-unders the most responsive in the world.

Game scenes with floral borders make the Silver Pigeon II stand out in any company.

686 SILVER PIGEON S

686 SILVER PIGEON S

With the same level of mechanical refinement as Beretta's higher end over-unders, this entry-level shotgun offers an economical way to enjoy both the aesthetics and quality of a prestigious Silver Pigeon. The extensive floral and scroll engravings are executed on a satin nickel-alloy finished receiver that is exceptionally resistant to wear and corrosion. And the dual-cone locking mechanism stands up to years of constant shooting.

Attractive scroll and floral decoration distinguish the Silver Pigeon S.

686 ONYX PRO, WHITE ONYX

686 ONYX PRO

Every bit as rugged as it is beautiful, the Onyx Pro features Beretta's exclusive X-Tra Grain surface tratment that enhances the wood grain on the stock and fore-end. You'll also quickly appreciate the recoil reducing Gel-Tek pad that keeps your shoulders fresh through hundreds of rounds. A striking example of the gunmaker's art, this over-under features a blued frame with Beretta's Dura-Jewel machining accenting subtle markings and a gold trigger.

686 WHITE ONYX

At some point in every sportsman's hunting life - whether as a novice or a seasoned shooter in need of an additional gauge - a no-nonsense, versatile tool is called for. The 686 White Onyx, with its streamlined stock design for fast target acquisition, top mounted bolt-lug design for secure barrel lockup, and easy maintenance, fits the bill. The satin nickel frame is accented with Beretta's Dura-Jewel finish for a classic look.

ULTRALIGHT

ULTRALIGHT DELUXE

When game trails are long and terrain is rugged, every ounce comes to tell as the hours pass. The Ultralight is a 12 gauge that carries like a small bore. The key to the Ultralight's feathery feel is a light but strong aluminum frame, reinforced at the breech face and shoulders with hard, durable titanium. In this Deluxe version, Beretta has added highly figured oil-finished walnut stock and full floral engraving with gold-filled game birds.

ULTRALIGHT

Like the Ultralight Deluxe, this sturdy over-under will help you stay afield. The lightweight aluminum and titanium alloys keep weight to the very minimum while preserving the smooth, sure handling you expect from a Beretta. The Ultralight has a semigloss-finished walnut stock with a Schnabel fore-end. Its receiver is distinctively decorated with the very game birds a hunter might pursue with Ultralight in hand.

Why low profile? Beretta's box lock mechanism allows a lower profile receiver. This benefits the shooter's accuracy, providing improved hand-to-eye coordination for instinctive shooting.

AL391 STONECOAT

AL391 STONECOAT GOLD

The AL391 Stonecoat Gold brings unmatched design and prestige to the most discriminating autoloader aficionado. Receiver, breech bolt, bolt handle, carrier, fore-end flange and trigger boast the unique Stonecoat multi-layered treatment of nickel, chrome, titanium-zirconium. A deep engraving and green enamel inserts give the Stonecoat gold its distinctive look. This distinctive sporting arm with superb recoil control performs as well as it looks. Its semiautomatic gas system cycles ammunition ranging from feathery target loads to thumping 12-gauge, 3-inch magnums.

AL391 STONECOAT

With a special multi-layered finish of nickel and chrome and a final protective layer of titanium and zirconium applied to the receiver and the proven self-compensating Beretta gas system, the AL391 Stonecoat defines both style and substance. The graceful lines of the silvery receiver blend seamlessly into the curves of the stock. Even with its luxurious look, you won't be afraid to take this Stonecoat out in the harshest elements thanks to Beretta's weather-resistant X-Tra Grain stock and receiver.

A green enamel inlay at the wrist gives the Stonecoat Gold a a distinctive look.

Stonecoat multi-layered finish.

AL391 GREYSTONE, URIKA PREMIUM, URIKA

AL391 GREYSTONE

The AL391 Greystone features a reduced 18,2 mm barrel bore diameter and a 70 mm cartridge chamber for improved shot pattern concentration, increased penetration and optimized muzzle velocity. The Greystone is a true expression of Beretta's skill in designing and in refining the mechanics with the versatile gas operation system of the Stonecoat models . The exclusive Greystone finish guarantees an overall higher resistance to wear and corrosion and superior longevity, enhancing the aesthetic of this model. Selected checkered walnut woods and richly jeweled bolt and carrier complete the look of the Greystone.

AL391 URIKA PREMIUM

The careful selection and wise combination of the finishes confer to the AL391 Urika Premium a completely new look. The luxurious aspect of the receiver is high-lighted by the contrast between the satin finish of its back and its meticolously hand-polished sides. The shiny black color of the receiver, bolt release button, fore-end gas flange and cap, perfectly complements the deep black of the barrel blueing and conveys to them a smooth look, pleasant to the touch.

AL391 URIKA

The workhorse of the Beretta autoloading line, the AL391 Urika's self-compensating gas system allows it to digest everything from the lightest target loads to the heaviest 2-ounce magnums. It's the answer to any hunting challenge. Reliability is the hallmark of this smooth-shooting, long-lasting auto shotgun. The 12 gauge is also available with Beretta's Optima-Bore® barrel and Optimachoke® tubes to cut recoil and improve patterns.

URIKA2 GOLD

AL391 URIKA2 GOLD

Beretta is introducing an enhanced version of the award-winning gas-operated semiautomatic that has sold over 1.5 million units worldwide since its introduction. The new Urika2 has several new and notable features which will make it the fastest, easiest, and smoothest handling semiautomatic on the market today. The AL391 Urika2 Gold features a higher grade of select oil-finished wood stock and fore-end. The upgraded engraving scheme features gold-filled game bird inlays.

AL391 Urika 2 Gold, 20 gauge.

URIKA2 CLASSIC

AL391 URIKA2 CLASSIC

For Upland hunters, the Urika2 Classic comes in a standard model that features the new X-Tra Grain® wood enhancement treatment — and for the first time on the base Urika — tasteful fine-line scroll engraving on either side panels of receiver.

THE BERETTA GAS SYSTEM IS TWICE AS FAST AS ANY OTHER OPERATING SYSTEM.

The gas system has been improved by the addition of a spinning and self-cleaning action. As gas pressure is fed into the gas cylinder, a series of expandable fingers on the piston move outwardly to clean the gas cylinder as the action cycles. Additionally, the gas piston is imparted with a spinning motion and "scraper teeth" to ensure carbon deposits are thoroughly dislodged and removed from the gas system. This improved cleaning action greatly contributes to enhanced reliability and longer functioning shooting periods between cleaning.

BURRIS SIGNATURE SELECT 8 X 56 MM

Every lens surface is broadband multicoated. The prisms include ultra-premium multi-coating and phase correction coating for the ultimate in viewing performance. Superlative optics combined with precision alignment and maximized light management design provides reflection-free bright resolution for the sharpest, most contrast and detailed, true-color images possible.

X-TRA GRAIN®

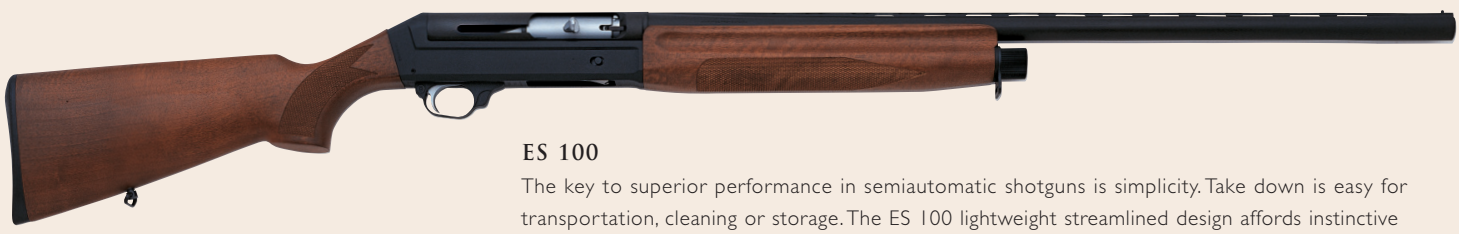

Also new is Beretta's proprietary X-Tra Grain® wood treatment on standard models. This wood surface enhancement process, applied to the walnut of the stock and fore-end is obtained from a new technology that highlights the color contrast of the wood, resulting in a beautiful and rich pattern.

ES 100

ES 100 WHITE

In addition to its reliable soft shooting gas systems, Beretta offers other unparalleled alternatives. The rugged, mechanically operated ES 100 boasts a vertical wedged locking lug that ensures a perfect lock-up. The ES 100 semiautomatics can handle anything from 2¾" (70 mm) loads to the heaviest 3" (76 mm) magnums. The new ES 100 White features an elegant nickel silver finish of the receiver and a superior quality of walnut stock and fore-end.

ES 100

The key to superior performance in semiautomatic shotguns is simplicity. Take down is easy for transportation, cleaning or storage. The ES 100 lightweight streamlined design affords instinctive handling, responsiveness and pointability. The checkered stock and fore-end made of straight grain walnut wood and sling swivels are provided. The Beretta ES 100 features the fully interchangeable Mobilchoke® tube system, whike all visible metal parts have an opaque black, anti glare finish. From upland to wild turkey there's a Beretta ES 100 that's suitable for every use.

APPAREL AND ACCESSORIES

GUN6 HAT
BE60 3660 COL. 75 SIZE S - XXL

Waterproof Cordura® hat with Gore-Tex® liner and Coolmax® cover fabric, fleece ear warmer, orange "high visibility" reversible fabric.

GUN6 GLOVES
GL30 3660 COL. 75
SIZE S - XXL

GUN6
GUN6 3660 COL. 75 SIZE S - XVL

Beretta's most exclusive hunting jacket is made of the brand new Huntex® fabric, a blend of cotton and Cordura®, durable, noiseless and soft to the touch. The heat-formed Gore-tex® liner and the CoolMax® lining ensure the utmost comfort, even in extreme weather conditions. The waterproof, breathable jacket keeps an even body temperature. This range also includes trousers, waistcoats, gloves and hats. These high-tech products and easy-to-wear garments are a must for hunting enthusiasts.

20 GOOD REASONS FOR CHOOSING GUN6

- Alcantara® collar lining and trim
- Removable neck protection
- Two-way heavy duty zipper closure with outside and inside wind protection flanges
- Ergonomic shoulders and sleeves
- Emergency waterproof hood
- Fleece-lined hand-warmer pouches
- Roomy game pocket with zip and stain-proof lining
- Velcro flap tabs
- Velcro flap closure scooped entry pocket for easy hand access
- Roomy bellows pockets
- Elasticized shell loops
- Adjustable storm cuffs
- Napoleon security pocket
- Internal mesh pockets with Velcro retainer
- Adjustable drawstring for added protection from the wind and rain
- Mobile phone pocket
- Document pocket with zipped closure
- Detachable mesh pockets for recoil pads
- Ventilation grommets
- Detachable shoulder straps

GUN6 FIELD PANT
CU03 3660 COL. 75 SIZE 46 - 62

Cordura® pants lined in Gore-Tex® are waterproof, durable and quiet.

APPAREL AND ACCESSORIES

KEVLAR

THE KEVLAR® AND CORDURA® FIBER GIVES KVJ HIGH RESISTANCE DURING INTENSE USE. THE COTTON GIVES IT A SOFT TOUCH WITHOUT CHANGING THE PERFORMANCE. THE BWB LINER GUARANTEES IT WILL BE WATERPROOF AND WINDPROOF. THE MIX OF COTTON, CORDURA® AND BWB PRODUCES A NEW FABRIC, WITH INNOVATIVE FEATURES: SOFT, BREATHABLE, LIGHTWEIGHT AND STRETCH.

BIS JACKET
GU1M 2882 COL. 99 - 75
SIZE XXS - XXXL

The Beretta Interactive System begins with the need to develop layered clothing theme to help in different climatic conditions. Warm and lightweight, it's less than 400g, breathable, packable in the inside pocket, and it can be worn inside all the BIS (Beretta Interactive System) jackets.

CO22 2 99
Hunting knife with stag horn handle, 2 blades: solid and hook blades.

NEW KVJ JACKET
GU1O 3677 COL. 79 SIZE S - XXXL

Kevlar® jacket with weld seam and YKK zip. BIS (Beretta Interactive System) jacket and vest for more warmth and protection from extreme conditions. Features: generous game bag with single entrance. Inside: ambidextrous recoil pads, mesh pockets, two security pockets.

KVJ PANT
CU1G 3677 COL. 79
SIZE S - XXXL

Features: elastic waist band, zipped closure with button, two generous front pockets, two back pockets, cargo pocket on the right leg, preformed knee, overboot cover flange with zipper entry.

APPAREL AND ACCESSORIES

MAXIMUM PERFORMANCE AND COMFORT ARE THE HALLMARKS OF BERETTA'S UPLAND SPORTMAN APPAREL AND ACCESSORIES.

THIS IS CLOTHING AND GEAR THAT ARE AS ELEMENTAL TO YOUR SUCCESS AS IS YOUR SHOTGUN.

COMFORT MAPPING JACKET

GU1E 3152 COL. 85-75 SIZE S - XXXL

The Comfort Mapping Concept, developed for Beretta clothing in collaboration with Gore-Tex®, is founded on the knowledge that our body is divided into different climate regions. Our innovative hunting jacket made of Cordura® and Gore-Tex® combines different fabrics in different body areas for waterproofing, moisture management and comfort thanks to the heat-formed seams. The BIS (Beretta Interactive System) jacket or vest gives it more warmth and performance in extreme conditions.

PACLITE® JACKET

GU4B 3120 COL. 75-87 SIZE S - XXXL

Gore-Tex® Paclite® Jacket weighs less than 500 g. Features: waterproof YKK zip with pull that is easy to grasp wearing gloves, generous pockets including chest pocket with two entrances (one on the front and the other side) to help with radio access. The hood is detachable and acts as a pouch to contain the easy-folding jacket, Velcro adjustable cuff, drawstring on the bottom. The BIS (Beretta Interactive System) jacket or vest gives it more warmth and performance in extreme conditions.

PACLITE® PANT

CU4B 3120 COL. 75-87

SIZE S-XXXL

Gore-Tex® Paclite® trousers are also ideal with the Comfort Mapping jacket. Features: elastic waist with front opening, two pockets with zip, which make this gament packable and over-the-boot cover flange zipper entry with Velcro closures so that they can be worn with boots, Beretta signature on the left leg.

APPAREL AND ACCESSORIES

TECNO2CHASSE

TECNO2CHASSE IS AN INNOVATIVE, QUIET FABRIC MADE BY BERETTA IN EXCLUSIVE WITH GORE-TEX®. IT IS A MIX OF CORDURA®, FOR HIGH ABRASION RESISTANCE, AND COTTON, WHICH GIVES IT A SOFT HAND. THE LINER IS WATERPROOF GORE-TEX®.

TECNO2CHASSE CAP

POINT PANTS
CU2C 3695 COL. 88 SIZE S - XXXL

Cordura® and cotton pants with liner Teflon®. Elastic waistband, generous pockets and bottom zip to fit with the boots.

APPAREL AND ACCESSORIES

VINTAGE YEARS

FOR 500 YEARS BERETTA HAS PURSUED ONE PASSION: THE LOVE OF NATURE AND OUTDOOR LIFE.

A BLEND OF CREATIVENESS AND TRADITION, MODERNITY AND HISTORY, THIS PASSION IS REPRESENTED IN VINTAGE YEARS.

THIS HISTORICAL CLOTHING WAS DEVELOPED WITH CLASSIC FABRICS AND INNOVATIVE TREATMENTS THAT HEARKEN BACK TO THE YEARS WHEN MASTRO BARTOLOMEO BERETTA WAS STARTING HIS WORK IN THE GUNSMITH WORLD. IT RESOUNDS WITH THE NOISE AND COLORS OF TUSCAN FIELDS.

TIBURZI JACKET
GU91 4400
COL. 20 – 22 – 72 – 83 – 88
SIZE 46 – 62

In the late 19th century in the Maremma, Domenico Tiburzi fought against injustice and the tyrannical acts of those who did not abide by the rules. He helped the needy by handing over to them the booty from his robberies. This 100% cotton Moleskin jacket takes inspiration from the one worn by the famous brigand. The result is a soft, elegant coat, ideal for the in-between season.

TUSCANY VEST
GU3R 1815 COL. 75 – 83 SIZE 46 - 62

100% double twist cotton vest with ten multifunctional pockets and easy cleaning zipped game bag.

CORBARA JACKET
GU8C 4600
COL. 72 – 80 – 88 - 38
SIZE 46 – 62

APPAREL AND ACCESSORIES

ST. JAMES SPORT JACKET

ST. JAMES BREEKS
CU36 6360 COL. 78-83-799 SIZE 46-6
Waterproof breeks with knee clasp in tweed with Beretta's exclusive BWB liner and heat-formed seam.

INTRODUCING
WATERFOWL

Opening day. A time-honored tradition mixed with today's technology and innovation. The feel of your favorite camo jacket brings back memories of satisfying hunts past. Your waders still wear last year's mud as a badge of honor. As you ready for the day, you gather shells, decoys, hot coffee — and your shotgun. Then crouch in a blind with your dog expectant and eager. The thunder of wings above. The hope of the day ahead. Then that one heart-stopping, defining moment: the shot, the splash, the retrieve.

These are the slices of time that stir the soul, that define the American Waterfowler's passion for the pursuit of the wild places. It is a passion backed by the confidence that your Beretta shotgun and gear are absolutely up to this specific challenge—no matter what the elements throw at you. That's a confidence, backed by 500 years of tradition and technological innovation, you can count on with every pull of the trigger or zip of the jacket.

WATERFOWL

XTREMA2

KICK-OFF

Optional Kick-Off® hydraulic dampening reduction system reduces recoil dramatically.

SYNTHETIC

AP CAMO

MAX-4 HD CAMO

Whether you are hunting the marshes or the wide open fields, there's a finish to handle the situation. The synthetic stock in black, Max-4® HD Camo or Hardwoods® HD Camo stands up to the elements.

UNTREATED

AQUA

TREATED

Using accelerated salt spray testing, the unprotected steel barrel section (top) shows corrosive effects while the Aqua–technology protected barrel (bottom) looks brand new.

XTREMA2
MOLDED CASE

Fitted, lined polypropylene case keeps the many supplied accessories in place. Includes 5 choke tubes, choke tube wrench, sling swivels, Beretta oil and butt plate or recoil pad.

"SOFT SHOOTING, HEAVY DUTY, RELIABLE, AND AMAZINGLY EASY TO CLEAN. THE XTREMA2 REPRESENTS QUITE POSSIBLY THE FINAL WORD IN 3 1/2-INCH SEMI AUTOS."

—Phil Bourjaily, *Field & Stream Magazine*

WWW.BERETTA.COM

WHEN WE DESIGNED A GUN FOR THE MOST EXTREME ENVIRONMENTS,

WE WERE SURE TO WIN SOME EXTREME AWARDS.

Xtrema2

A391 XTREMA2

In 2002, Beretta introduced the original Xtrema. This gun quickly garnered *Field & Stream's* "Best Gun of the Year Award," *Guns & Ammo's* "Editor's Awards for Gun of the Year," and *American Rifleman's* "Golden Bulleye Award." In the relentless pursuit of excellence, our engineers have once again set the benchmark for a "do-it-all" shotgun in the form of the new Xtrema2 — *Shooting Illustrated's* "Shotgun of the Year."

This superb autoloading shotgun was designed and built to reliably function 2 3/4-inch (70 mm), 1-ounce equivalent loads through brutal 3 1/2-inch (89 mm) magnum loads — interchangeably if you so desire. The Xtrema2 has more recoil reduction features than any other autoloading shotgun on the planet!

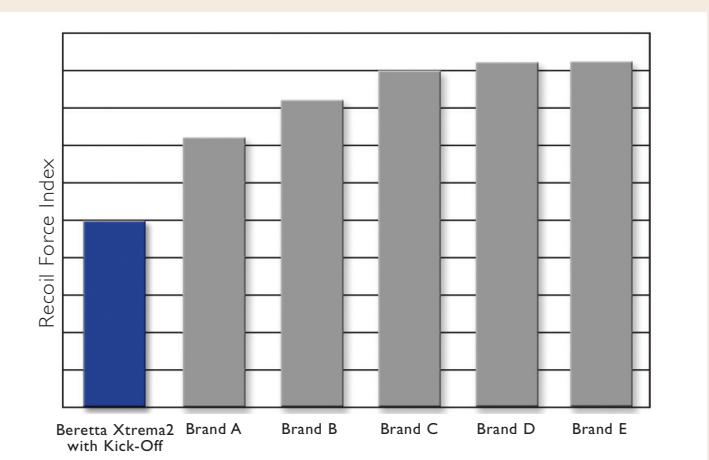

STRESS CONCENTRATION IMAGING

This shows the behavior of the Gel-Tek pad during the shooting cycle. Note the homogenous distribution of stress over the entire surface.

WHY BERETTA GAS OPERATED

Beretta's unique self-compensating semiautomatic gas operation system is considered the best in the world. The soft shooting gas system's recoil reduction automatically vents the excess gases of even the most powerful cartridges.

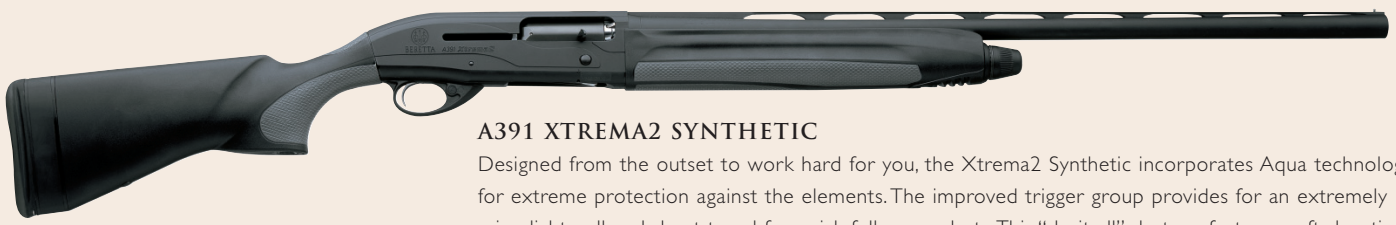

RECOIL REDUCTION

Beretta's new Kick-Off® hydraulic dampening reduction system reduces recoil an astounding 44% more than its closest rival by using two hydraulic recoil dampers incorporated into the stock "spacer" unit. The recoil energy is gradually dissipated by the hydraulic dampers, resulting in superior comfort for the shooter.

XTREMA2

A391 XTREMA2 SYNTHETIC

Designed from the outset to work hard for you, the Xtrema2 Synthetic incorporates Aqua technology for extreme protection against the elements. The improved trigger group provides for an extremely crisp, light pull and short travel for quick follow-up shots. This "do-it-all" shotgun features soft shooting gas operation, an integrated spring-mass recoil reducer, Optima-Bore® overbored barrel and Kick-Off® recoil reduction.

A391 XTREMA2 CAMO AP®

The new All Purpose A391 Xtrema2 semiautomatic boasts a refined camo pattern designed to let it camoflage in nearly every setting. This superb autoloading shotgun keeps all the superior features of the synthetic model among which the extraordinary recoil reduction capability and the superior pattern efficiency of the Optima-Bore® and Optimachoke® Plus tubes.

QUICK DETACHABLE SLING SWIVEL

Thanks to an exclusive quick-release system it is possible to fasten and remove the rear swivel from the stock without any tool.

BURRIS FULLFIELD II CAMO BINOCULARS

See, but don't be seen. These new premium binoculars compress full-size performance about as compact as can be.

URIKA2

AL391 URIKA2 CAMO AP®

Dressed in camo that disappears in nearly every setting, the AL391 Urika2 All Purpose® is a foil for the gobbler's keen eyesight. This reliable autoloader is a real workhorse, too. Beretta's self-compensating gas system allows for smooth shooting in a wide range of loads, while the Optima-Bore® system reduces recoil and improves pattern performance by easing the shot charge's passage from cylinder to bore. The Kick-Off® hydraulic dampening reduction system is available on request.

AL391 URIKA2 CAMO MAX-4®

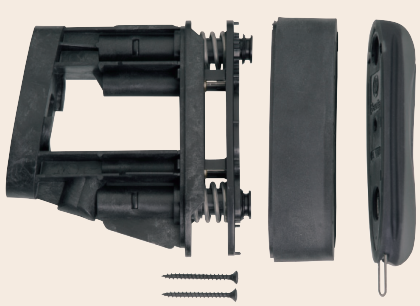

A smooth shooting, long-lasting auto shotgun, the AL391 Urika MAX-4® HD features the most effective and up-to-date camo pattern on the market — no matter which flyway you shoot on. Beretta's well-proven, self-compensating gas system provides just the right pressure for a wide range of loads, while the Optima-Bore® overbored barrel cuts recoil and improves your patterns. Kick-Off® on request.

AL391 URIKA2 SYNTHETIC

For the waterfowler who enjoys his shotgun in basic black and prefers the durability and versatility of a synthetic stock, this sleek autoloading shotgun is the answer. The hammer-forged barrel is chrome lined for corrosion resistance and easy cleaning, while Beretta's self-compensating gas valve lets you shoot the full range of your favorite ammunition. Kick-Off® on request.

KICK-OFF

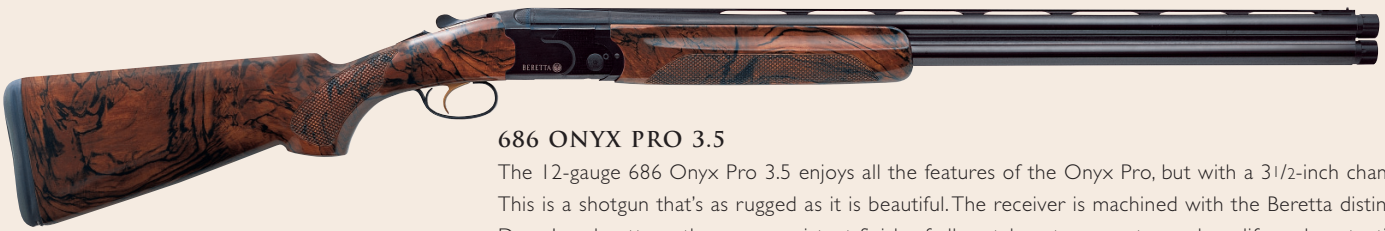

RECOIL REDUCTION

Beretta's new Kick-Off® hydraulic dampening reduction system reduces felt recoil by using two hydraulic recoil dampers incorporated into the stock "spacer" unit. The recoil energy is gradually dissipated by the hydraulic dampers, resulting in superior comfort for the shooter.

686 ONYX PRO

686 ONYX PRO 3.5

The 12-gauge 686 Onyx Pro 3.5 enjoys all the features of the Onyx Pro, but with a 3 1/2-inch chamber. This is a shotgun that's as rugged as it is beautiful. The receiver is machined with the Beretta distinctive Dura-Jewel pattern, the super resistant finish of all metal parts guarantees a long life and protection against scratches and weather conditions. Beretta's proven combination of tang safety and barrel selector put you completely in control. The special high grip checkering, the wide beavertail fore-end, the Gel-Tek recoil pad and the Hunting Extended Mobilchoke® tubes guarantee a superior performance.

The lustrous frame finish makes the Onyx a striking example of the gunmaker's art. As with the White Onyx, the Onyx Pro offers Dura-Jewel enhancements.

Special Beretta Laser technology high grip checkering.

Beretta's proven combination of tang safety and barrel selector put you fully in control.

APPAREL AND ACCESSORIES

XTREMA GEAR JACKET & PARKA
GU8D 3160 JACKET COL. 77 SIZE S-XXXL
GU8E 3160 PARKA COL. 77 SIZE S-XXXL
With a particularly quiet fabric and a GORE-TEX® shell, our parka (full coverage) and wader jacket (shorter length to go in the water) were designed specifically to meet the outerwear performance demands of waterfowlers. Features include waterproof zippers and pockets, non-skid shoulder gun rests, a drawstring waist, magnetic pocket flaps, detachable hood, and reinforced pockets big enough to hold a full box of shells.

MAX 4 HAT
BE63 3160 COL. 77
ONE SIZE
Complete your camo package with this waterproof GORE-TEX® fleece-lined hat. Drop-down ear flaps, adjustable locking cord.

XTREMA GEAR BIBS
CU83 3160 COL. 77 SIZE S-XXXL
Lightweight Thermore® insulation maintains your body temperature; waterproof zippers and drainage grommets help keep you dry. Adjustable heavy-duty shoulder straps, upper handwarmer pockets, overboot cover flange, and high-back kidney warmers.

XTREMA GEAR GLOVES
GL34 3160 COL. 77
SIZE S-XXL
Adjustable-fit performance gloves, windproof, waterproof and warm thanks to GORE-TEX®, Windstopper® and Thermore® linings. Beretta's exclusive non-slip grippng surface.

APPAREL AND ACCESSORIES

WATERPROOF XTREMA GEAR

XTREMA GEAR IS BERETTA'S COLLECTION OF BAGS DESIGNED ESPECIALLY FOR WATERFOWL HUNTING. BUILT TO TAKE WHAT NATURE DISHES UP, THE BAGS ARE SEALED ON THE OUTSIDE TO KEEP THE INSIDES DRY. THE BRUSHED, 800-DENIER POLYESTER FABRIC IS COATED WITH POLYURETHANE AND RF WELDED TOGETHER TO BE TOUGH, QUIET, AND WATERPROOF. AND THEY EVEN FLOAT — WHAT MORE COULD YOU WANT?

Xtrema GEAR

XTREMA GEAR FIELD BAG
BS47 140 77

The bottom snaps together in the middle to reduce the bulk and size. Exterior pockets for game calls, shells, maps, and personal extras. Water and dust-proof zippers.

XTREMA GEAR BLIND BAG
BS48 140 77

Insulated thermos or water bottle pocket with drain, map pocket, shell and choke sleeves, exterior and interior pockets for cleaning or personal items. Anti-slip padded shoulder strap and easy-carry removable handle. Water and dust-proof zippers.

XTREMA GEAR GAME BAG
BS49 140 77

A unique sealed inner bag, in combination with a fully sealed outer bag. Inner bag removes easily for cleaning. Easy to carry either over the shoulder or in the hand. Water and dust-proof zippers.

XTREMA GEAR STORMPROOF CAMO SHOTGUN CASE
FO59 140 77

Padded grip handles make it easy to carry in the hand or over the shoulder. Every zipper is sealed, not sewn, with a stormproof urethane coating. Simply hose down to clean. Water and dust-proof zippers.

APPAREL AND ACCESSORIES

LONG SLEEVE MOCK TURTLENECK

P200 7101 COL. 77 SIZE S-XXXL

Ideal under any Beretta outerwear, our prewashed 100% cotton turtleneck is as comfortable as it gets. Beretta logo embroidered on the collar.

WIND BARRIER SHORT AND LONG ZIP SWEATERS

PU33 7019 COL. 75 LONG ZIP SIZE S-XXXL

PU34 7019 COL. 75 SHORT ZIP SIZE S-XXXL

You'll find pure wool for warmth and rugged good looks on the outside of this sweater. But inside lies the secret: a barrier lining that keeps the coldest winds at bay. Fleece-lined collar, cotton twill gun patches, ribbed knit cuffs and bottom.

WWW.BERETTA.COM

INTRODUCING
BIG GAME

Since the very first day you took to the mountains or the plains to test yourself against the cunning of the world's most sought after game, you've waited for this very instant. Both you and your prey are frozen in time. You've tracked this trophy, not just for hours or days, but since the very first time your father or your grandfather initiated you into the brotherhood of the hunt. With the prize squarely in your scope, you squeeze and put your faith in the hands of your rifle.

For the Big Game Hunter, nothing is more important than accuracy and reliability. No one understands that better than Beretta. Every rifle leaving the factory must be capable of grouping within one inch at a hundred yards—period. Sako and Tikka rifles are not just a benchmark in the industry, they have proudly helped define hunting tradition. Along with Big Game Hunting apparel and accessories, tested time and again by professional guides and hunters, these are the tools that define your heritage.

SAKO 85 HUNTER

Home to an impressive number of top Olympic shooters, Finland is also home to some of the world's finest rifles. For over eighty years, Sako Ltd. of Finland has impressed the world with its passion for quality and its commitment to offering shooters the best rifles that technology can offer — without compromise. Sakos are regarded the world over as truly custom rifles at production prices. Beretta is proud to call this brand a prominent part of its family.

PRECISION AND SPEED EQUALS ACCURACY

The Sako 85 offers the shooter a crisp, single-stage trigger, user adjustable between 1 and 2 kilograms, and an incredibly fast total lock time of under 1.3 milliseconds.

The Sako 85 Short Claw Extractor commands total control of the cartridge, engaging the extractor groove of the cartridge as the cartridge rises from the magazine, positively guiding the cartridge into the chamber of the rifle. When single- round feeding, most controlled-round feed rifles require the cartridge to first be placed into the magazine. Not so the Sako 85. The cartridge may be inserted directly into the chamber of the rifle and the bolt closes without any worry of damage to the extractor claw or cartridge rim.

SAKO'S FIRST NEW PRODUCT IN A DECADE

WORLD'S FINEST PRODUCTION RIFLE

SAKO 85 HUNTER

The new Sako 85, a celebration of the riflemaker's 85th anniversary, is a superbly executed medley of tradition, technology and precision. Continuing Sako's time-honored tradition of crafting exceptional rifles for the hunter and target shooter, the Sako 85 incorporates the features most sought after by experienced riflemen: controlled-round feeding, an exceedingly fast lock time, a user adjustable trigger, 70-degree bolt handle lift with a silky smooth bolt travel, and broad flat bedding surfaces. The rifle's stock is crafted from select walnut and features the classic straight comb and shadow-line cheekpiece that premium-rifle owners appreciate. Individually factory tested and guaranteed to shoot five-shot groups of 1 MOA or less out of the box.

The new, patented, Total Control Magazine Latch prevents accidental release of the detachable stainless steel magazine under the heaviest recoil or the harshest of hunting conditions. If desired, the magazine may be reloaded without being removed from the rifle.

Classic straight comb with shadow-line cheekpiece.

SAKO 85 BAVARIAN

The new Sako 85 Bavarian is a masterpiece combining high grade walnut stock in traditional European style with the superior performance and technology of Sako 85. Under its stylish exterior design are new modern features and attention to detail, which enhance the experience of owning and shooting one of the world's most popular and respected rifle.

SAKO 85 SYNTHETIC STAINLESS AND LAMINATED STAINLESS

SAKO 85 SYNTHETIC STAINLESS

A masterful blending of Sako performance, tasteful innovation and world-class Giugiaro design, this synthetic-stock rifle features a controlled-round feeding all-stainless action and a match-grade, free-floating, hammer-forged stainless steel barrel. No matter how long a downpour, this rifle will be ready to hunt. The FinSoft recoil-absorption system dramatically reduces felt recoil, especially in the shooter's cheek as the comb line moves down under recoil.

WEIGHT	SEE CHART PAGE 54

SAKO 85 SYNTHETIC EXCLUSIVES

Synthetic-stocked rifles frequently weigh less than their wood counterparts and, therefore, recoil slightly more. The innovative FinSoft recoil pad system absorbs and dissipates recoil forces away from the cheek, in more than one direction. Left-handed shooters can convert the stock with an accessory cheekpiece.

SAKO 85 LAMINATED STAINLESS

A natural-born Finnish hunter, the Sako 85 Laminated Stainless features the same all-stainless barreled action as its cousin, the Sako 85 Synthetic Stainless combined with an attractive, natural-feel, ultra-tough checkered grey laminated stock. The stainless barreled action and warp-free stock make this rifle perfect for hunting in extreme conditions while retaining the traditional warm look and feel of the wood stock.

SAKO 85 HUNTER LAMINATED STAINLESS

WEIGHT	SEE CHART PAGE 54

The bedding of the receiver is critical to the accuracy of any rifle. The flat bottom and side profiles of the Sako 85 receiver in conjunction with the innovative recoil lug, integral to the stock, allow stockmakers to mate the receiver to the stock with a degree of precision which is far more difficult to achieve with round profiled receivers and conventional recoil lugs. These flat surfaces also reduce the torque twist of the receiver.

SAKO 85 FINNLIGHT AND VARMINT

SAKO 85 FINNLIGHT

When weather is at its worst, determined hunters know there's no substitute for the combination of a stainless steel barreled action and a synthetic stock. No matter how long a downpour drenches these rifles, they'll be ready. Available in 13 calibers ranging from 22-250 Rem to 300 Win Mag in four action lengths, there's a Finnlight for almost any game, anywhere, anytime. As with all of our stainless rifles, the Finnlight's inner parts are also stainless.

Every Sako barrel is cold-hammer-forged and finished in-house to ensure match-grade accuracy. The muzzle crown is carefully cut by hand and final inspection is done using the most complex and highly refined optical fine tuning instrument known to man: the human eye.

WEIGHT	SEE CHART PAGE 54

SAKO 85 VARMINT

The sako 85 Varmint is a long range hunting rifle built to deliver pinpoint accuracy for hunting and target shooting. The heavy, free-floating barrel diminishes vibration and recoil, and makes it easy to zero in and stay on target. Selected walnut used in Varmint rifle stock enhances both comfort and accuracy, and features an extra wide, flat-bottomed beavertail fore-end and more pronounced pistol grip for better bench shooting position.

SAKO 85 VARMINT

ACTION	3-LUG BOLT ACTION

WEIGHT	SEE CHART PAGE 54

The lengthened rear bolt guide makes an already smooth action even smoother. Typically, the shorter the action the more susceptible it is to bolt bind due to decreased bearing surface area. The lengthened rear bolt guide surface of the Sako 85 ensures the smoothest possible bind-free bolt travel, even in the very popular WSM chamberings.

SAKO QUAD

One rifle now allows you to own any or all of the four most popular rimfire cartridges available. Truly unique in the world of rimfire rifles, the Sako Quad lets you select any of the four interchangeable cold-hammer-forged rifled barrels and change them in seconds. The barrels may be removed and replaced without change in the point of impact. The Sako Quad features a supersmooth bolt throw with a short 50-degree bolt handle lift, detachable magazine, and user adjustable trigger system. Complete rifles and optional spare barrels chambered for .22 LR, .17 HMR, .22 WMR or .17 Mach2 are available.

SAKO QUAD HUNTER

The Sako Quad Hunter features an attractive oil-finished walnut stock that will please even the staunchest traditionalists. Sako craftsmen have created a new checkering pattern integrating the distinctive "shark-gill" design of the original Quad Synthetic with traditional cut checkering. Like the Synthetic, the Quad Hunter features a detachable magazine, adjustable trigger, and minute-of-angle accuracy.

SAKO QUAD SYNTHETIC

The Sako Quad Synthetic defines versatility and durability in the rimfire rifle world. The Quad Synthetic marries all the precision and innovative features of the Sako Quad barrel and action system with the rugged durability and stability of a fiberglass-reinforced copolymer synthetic stock.

SAKO QUAD

SAKO QUAD COMBO

.17 Mach2, .17 HMR, .22 LR, .22 WMR. Each of these four great rimfire cartridges works best for specific shooting needs. Now, there is no need to ponder over whether you have chosen the best small-bore rimfire caliber. The Sako Quad Combo is one rifle, four barrels, and two unique dual-caliber color-coded magazines. Available in either Hunter Combo or Synthetic Combo.

A high quality fitted aluminum case with barrel changing tool and room for a scope is supplied as standard with the Sako Quad Combo.

Each barrel and magazine is color coded for easy recognition. Just match the barrel band color with the correct dot color on the magazine. As an added feature, the magazines provide a unique safety system to prevent insertion with the wrong barrel in place.

BURRIS SAKO QUAD 3-9X40 MM SCOPE

Color-coded windage and elevation adjustments are matched to the color coding on the Sako Quad barrels. Once calibrated for each of the calibers, a barrel change requires only a turn of the corresponding dial to zero the scope to the appropriate barrel.

SAKO TRG

SAKO TRG

Sako TRG is a total accuracy concept designed for one job only: to hit the target. This spectacular result of 100% Sako innovation gives you performance that transcends the highest demands for accuracy, reliability and versatility. The TRG is designed to meet individual tasks, and adjusts to each shooter's personal style, build and posture. Super target grade barrels, specially made for TRG (Cr-Mo or stainless), are cold-hammer forged. The solid vault-like action is also hammer forged from special steel alloy. The sturdy bolt with three locking lugs feeds rounds unfailingly from the centerline of a detachable staggered magazine. Bolt lift angle is only 60° for fast bolt throw. The target trigger is a fully adjustable two-stage unit. The integral 17 mm axial rails with recoil stop-slots on the top of the receiver allow a quick and perfect scope mounting.

TRG-BIPOD

Especially designed for sniping this new bipod lets the rifle "hang" below the hinge-point offering very steady shooting position even with large and heavy scopes on the rifle.

BUTT STOCK

Adjustable for height and cast-off/on. Cheekpiece adjustable laterally and with spacers also vertically. Specially designed contour allowing for steady and firm firing position

Tactical scope mount for modern three turret tactical scopes (30 and 34 mm tube diameter). The mount has 0.5 degree elevation allowance (30 MOA) for better adjustment range capability in long range shooting.

Highly effective three-chamber muzzle brake.

SAKO TRG

All Sako TRG receivers are drilled and tapped for tactical (Picatinny) rails compatible with USA MIL-STD 1913. Configurations include black or green high-tech aluminum reinforced composite fully adjustable stock (cheekpiece and buttplate) with different finishes on barrel and action. Also available in an all-black stealth configuration featuring black stock with phosphatized barrel and action. Optional TRG accessories include a highly effective 3-chamber muzzle brake, innovative clip-on bipod, extra magazines, auxiliary adjustable sights, mirage strap, scope mounts, Picatinny interface, sling and swivels, cleaning kit, logistic transportation case as well as spacers for cheekpiece and butt plate.

SAKO TRG 42

The TRG 42 in 300 Win Mag and 338 Lapua Mag is a true long-range precision tool already adopted by numerous military and law-enforcement special units worldwide and also suitable for competition. The 338 Lapua Mag. caliber is also suited for antimaterial purposes. The rifle can be equipped with various accessories to fulfill the demands of tactical snipers.

SAKO TRG 22

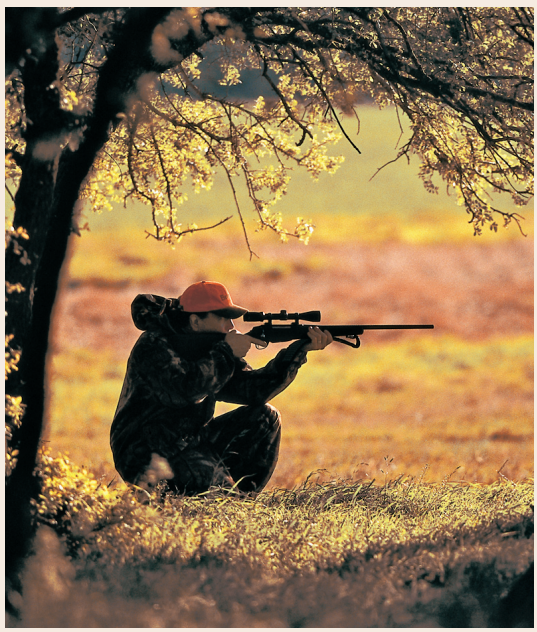

The TRG 22 in 308 Win handles a multitude of accuracy tasks: it is a thoroughbred 300 m ISSF standard competition rifle, a CISM competition winner and serves the governments of several nations as their primary sniper rifle.

TIKKA T3 SERIES

Redefining what a hunter can expect from a rifle in its modest price range, the Tikka T3 is taking the American market by storm. The principle around its design is bold: with today's available technology, there is no excuse not to incorporate the most desirable features in a rifle. So the engineers at Sako in Finland and the designers at Giugiaro in Italy went to work. The result is truly the finest production rifle available to the Big Game shooter, a rifle that incorporates an action, an adjustable trigger, distinctive styling at a truly unbeatable price tag. But most importantly, each one of these rifles only leave Finland after grouping three shots under 1 inch at 100 yards, making them an industry benchmark for out-of-the-box accuracy.

TIKKA T3 HUNTER

The Tikka T3 Hunter features a glass-smooth action, a crisp, adjustable trigger, free floated match-grade hammer-forged barrel and a perfect mating between stock and metal. No Tikka T3 is even put on the shipping dock unless it groups 3 shots within 1 inch or less at 100 yards. Besides this fabulous performance, the T3 Hunter features a blend of Giugiaro distinctive checkering with the classic elegance of wood.

TIKKA T3 SERIES

TIKKA T3 LITE

Inspired by the strengths of the mighty game animal, the Tikka T3 Lite is perfect for the hunter who chases his quarry in dense woods or from a tree stand, or for the rancher who likes to keep a versatile rifle handy. Just as accurate as its full-size brothers, this synthetic features a quick-handling 19-inch cold-hammer-forged and free-floated barrel. Durable fiberglass-reinforced polymer stock with a straight comb and ambidextrous palm-swell.

A short bolt-lift angle of 70 degrees combined with a bolt throw to match the cartridge length means quick and smooth bolt cycling.

TIKKA T3 LITE STAINLESS

Synthetic stocks are the choice of hunters who must face tough weather conditions. With its stainless steel finish, the Tikka T3 Lite Stainless offers even better resistance to the elements. The lightweight, injection-molded stock is a godsend to hunters who spend long days in the mountains, as is its guaranteed accuracy. With a Giugiaro-designed stock, this rifle's harmonious and functional layout is both handsome and fast handling.

TIKKA T3 SERIES

TIKKA T3 BATTUE

This lightning-fast rifle is built for driven hunts where most shots are taken at running game over relatively short distances. The handy Tikka T3 Battue rifle is also the top choice for a hunter who trek and hunt in heavy cover. Designed for fast target acquisition, it boasts a short barrel. Perfect balance and highly visible battue sights with Truglo® optic fibers enable fast and easy aiming. Topped with a rifle scope and Optilock® scope mounts, the Tikka T3 battue has the acuracy to reach game even at longer distances.

The T3 battue sight with Truglo® optic fibers are highly visible and provide fast aiming.

TIKKA T3 VARMINT

Serious varmint hunting and benchrest shooting require the hyperaccuracy of the Tikka T3 Varmint. The cold-hammer-forged barrel has a true varmint-style "bull" contour for maximum rigidity and absolute performance. The stable synthetic stock incorporates a high comb and wide forearm for better stability. As with all Tikka T3 rifles, the muzzle crown is concave and hand-turned — a custom feature that will enhance the performance of your rifle by protecting the lands and grooves from anything that may come into contact with the muzzle.

The ridged Tikka receiver is topped off with integral rails for use with Optilock mounts. This action is also drilled and tapped for use with conventional bases.

TIKKA T3 TACTICAL

TIKKA T3 TACTICAL

When it comes to accuracy, the Tikka T3 Tactical is in a class of its own. The free-floating barrel is made of match grade Cr-Mo steel and manufactured by a precision cold-hammer forging process. The action and the barrel surfaces are manganese phosphatized for lasting protection against the elements and wear. The modern Teflon coated bolt has two front locking lugs and springloaded plunger ejector with 70 degree opening angle for fast, smooth and reliable operation. The 2-way safety locks both the bolt and the trigger. The trigger unit is adjustable with hand-honed sear/trigger without creep. Single set trigger is optional.

The detachable straight-feeding single column magazine is silent, durable and non-rusting. The standard 5/6-round magazines are tailored for each caliber for ultimate reliability and performance. New color coded magazines optional make the use of different loads easy to separate.

The stock is made of fiberglass reinforced copolymer polypropylene. The cheek-piece is adjustable at 5 mm interval up to 25 mm. The adjusting wheel can be fitted on either side of the stock.

ACCESSORIES

The standard Picatinny rail takes any Weaver or U.S. Mil. Std. 1913 compatible mounts. Scope, scope mounts, bipod, muzzle brake and heavy duty swivel studs are optional, as well as adjustable open sights and fore-and rear-stock fastened military type heavy duty sling studs for hook-type swivels.

RIFLED SLUG GUNS

In many areas of the world, the Rifled Slug Gun is the firearm of choice for non-dangerous big game hunting and there is no finer choice than the Beretta series of Slug Guns. Both Beretta Slug Guns feature 24-inch barrels with a rifling profile optimized for superior accuracy with sabot-style slugs. These barrels feature chrome-lined chambers and bores for ease of cleaning and rust resistance. The integral cantilever Picatinny scope-mount rail of the XTrema2 ensures constant ridged alignment of the scope to the barrel for maximum accuracy and accepts common Weaver-style scope rings, such as Sako Optilock and Burris systems.

Xtrema2

A391 XTREMA2 SYNTHETIC RIFLED SLUG

No other autoloading shotgun can match the Xtrema2 on reliability, recoil reduction, and simplicity of maintenance. Featuring Aqua technology for extreme environmental protection, the Xtrema2 Synthetic Rifled Slug Gun is constructed of advanced corrosive-resistant materials in all its internal and external components.

ES100 RIFLED SLUG

Designed for wild-boar and deer hunting, the ES100 Rifled Slug gun is a 12-gauge, inertia-operated semiautomatic with a 3-inch chamber. Its one-piece receiver and barrel design enhance accuracy by keeping a scope properly aligned with the barrel. Heavier contour makes the barrel more rigid and the gun softer-recoiling. The traditionally checkered stock and fore-end are made of selected walnut. Front and rear sight are fixed.

ES100 RIFLED SLUG

The one piece receiver and barrel design locks these key components together for maximum precision. This stability further enhances accuracy by keeping a scope properly aligned with the barrel.

SLUG GUNS

471 SILVER HAWK SLUG

Remarkably light and responsive, the Beretta 471 Silver Hawk Slug side-by-side unites almost 500 years of tradition and elegance with modern and innovative technology. Its short cylindric barrels are specially designed to guarantee the best target acquisition and the maximum stopping power. Adjustable rear sight with folding leaf and ramp front sight, wraparound beavertail fore-end and rubber recoil pad feature in this model destined for the traditional hunting of hooved animals.

AL391 STONECOAT SLUG

With the proven self-compensating Beretta gas system and the exclusive recoil reducing Gel-Tek pad, the Beretta AL391 Stonecoat Slug performs a superb recoil control. Its special multilayered finish of nickel and chrome with final protective layer of titanium and zirconium will protect it from wear and corrosion. The special rib with adjustable V-shaped rear sight and the blade front sight with hood are standard. The receiver is designed to accept a weaver base to accept optics or other aiming systems.

AL391 URIKA2 CLASSIC SLUG

The new Urika2 Classic is now available also in this performing Slug version offering the ultimate features of the new self-cleaning gas system and the new X-Tra Grain wood enhancement treatment. A fine-line scroll engraving on both side panels of receiver distinguishes this model.

EXPRESS DOUBLE RIFLES

Rugged, reliable, accurate and lightweight, the Beretta Express 689 Sable over-and-unders have the power to stop game with the first shot, and the quick second-shot reliability to ensure an accurate follow-up shot if necessary. The 689 Sable are built on Beretta's reliable 20 gauge box lock shotgun frame and boast rifle-type firing pins and breech faces toughened to handle large centerfire cartridges. Barrels are rotary forged and precision-rifled to deliver remarkable accuracy. The short upper rib is designed to accept Weaver bases for scopes or other aiming systems. The V-notch rear sight features red luminous points. On request, they can be supplied with hook-in base for scope or with claw mounts. Formed from carefully selected walnut, the stock and fore-end have a European-style cheek rest.

689 GOLD SABLE

The 689 Gold Sable is available with light scroll engraving on the color case-hardened receiver and superior solid rib. The stock and fore-end are of the finest walnut.

689 SILVER SABLE II

Magnificent bas-relief engravings on the sides of the receiver show wildlife in their natural habitat, while all exterior metal surfaces are subtly decorated. The exclusive Beretta nickel based treatment protects the receiver from atmospheric damage.

APPAREL AND ACCESSORIES

SCHWARZWALD JACKET

GU4P 3290 COL. 702 SIZE S – XXXL

Brand new warm jacket, made of tough cotton blend waterproof and silent fabric. It's the most advanced range developed for any hunter requiring to spend long hours in hard weather conditions and be warm and dry.

Features: high neck with inner micro-polarfleece for best comfort, napoleon pocket under the zip cover, adjustable cuffs, double radio pocket, hand warmer pocket with inner micro-fleece, positioned very low to guarantee maximum comfort also when sitting, removable Beretta hands-free shoulder strap, under-arm vents with zips, large front loading pockets, the left one with additional security pockets and removable hood reversible in orange colour if needed. Leather details. In the inside: mesh pocket for the recoil pad, adjustable waist draw cord, inner "skirt" to protect from the wind.

SCHWARZWALD VEST

GU4Q 3290 COL. 702

SIZE S – XXXL

Brand new vest, made of tough cotton blend silent fabric with Teflon treatment.

Features: hand warmer pocket with inner micro-fleece, positioned very low to guarantee maximum comfort also when sitting, large front loading pockets, the left one with additional security pockets and waist regulations. Leather details. In the inside: mesh pockets for the recoil pad and security pocket with zip.

SCHWARZWALD PANT

CU1C 3290 COL. 702 SIZE S – XXXL

Brand new six pocket hunting pant, made of tough cotton blend waterproof and silent fabric. It's the most advanced range developed for any hunter requiring to spend long hours in hard weather condition and be warm and dry. Features: two pockets at waist plus zipped security pocket, two large front loading pockets, the left one with additional security zip, knife pocket, back waist elasticised band to guarantee a perfect fit and bottom leg opening with zip.

APPAREL AND ACCESSORIES

TESTED TIME AND AGAIN BY PROFESSIONAL GUIDES AND HUNTERS, BERETTA'S BIG GAME HUNTER COLLECTION LETS YOU TAKE TO THE FIELD IN FULL CONFIDENCE YOU'RE EQUIPPED WITH THE VERY BEST.

SUPER SUMMER JACKET
GU61 2583 COL. 82 – 75 SIZE S – XXXL

An extraordinary functional safari jacket with shell loops, freedom of movement pivot sleeves and four cargo pockets with buttons flap.

SAFARI LINEN SHIRT
LU14 7544 COL. 01 – 56 – 82 SIZE S – XXXL

Linen shirt with upper chest pocket, pocket strapping for load support.

BURRIS LANDMARK SPOTTING SCOPE

Spotter's sharp, clear images allow you to discern bullet holes in a target at 1000 yards.

APPAREL AND ACCESSORIES

SAFARI WOMAN JACKET
GD81 2591 COL. 75 – 82 – 80 SIZE 38 – 52
Double twisted cotton Sahariana perfectly tailored with generous cargo pockets and removable belt.

VINCENT HANCOCK (USA) - WORLD CHAMPIONSHIP SKEET 2007: BRONZE MEDAL - WORLD RECORD: 125/125 AND WORLD RECORD FINAL: 150/150.

INTRODUCING
VICTORY

The scorecard, the moist palms, and the lineup of like-minded competitors might indicate otherwise. But as the clays fly across your line of vision, you stand alone, competing against no one but yourself. Every inch of your being is focused, balanced, alert, working in unison. There's no denying you are here to win, to stand proudly on the podium. But more than anything else you are here to perform unfalteringly. To prove you've shot your very best.

To compete successfully, the Victory shooter requires dependable performance. Not just from themselves, but from their shotgun and the specialized apparel and accessories that work together to give them a competitive advantage. Designed for maximum performance in any event, Beretta's competition guns and clothing are the epitome of the craft, a testament to optimum control and reliability—as gold medal winners worldwide will attest.

DT10 TRIDENT

DT10 TRIDENT TRAP

Features, dimensions, weight, balance, point of impact…everything in Beretta's competition over-and-unders, the DT10 Trident, has been professionally refined to meet and surpass the technical requirements of serious competition. You'll never have to worry about a broken spring or clogged mechanism thanks to the DT10's quick-detach, removable trigger group. Specific features are the international style select walnut stock, the competition beavertail fore-end, the special top rib with white or red front sight.

DT10 TRIDENT X TRAP COMBO

A shotgun that's at home at any level of competition, from league night at your home club to the Olympics, the DT10 X Trap Combo is Beretta's top-of-the-line competition shotgun. In addition to the over-and-under Optima-Bore® barrels with Optimachoke® tubes an interchangeable bottom single barrel with adjustable top rip is supplied. The Montecarlo adjustable stock features the patented Memory System. Wide beavertail fore-end, tapered progressive top rib, white front sight wit mead bead are standard.

DT10 TRIDENT

DT10 TRIDENT SKEET

For skeet devotees, there's no finer choice than the DT10 Trident Skeet, no matter what level of competitive shooting you participate in. The skeet version with adjustable stock allows you to regulate your personal sight picture. Beretta's patented "Memory System" lets you remove and replace the comb without losing your individual settings. The Optima-Bore® barrel system with Optimachoke® tubes improves shot pattern distribution and velocity, felt recoil reduction.

DT10 TRIDENT SPORTING

For the sporting clays, the DT10 Sporting is the shotgun of choice. Like all Beretta DT10s, it features an ergonomic top lever and a detachable trigger assembly that can be removed from the receiver without tools for cleaning or maintenance. This masterpiece also offers a modified cross-bolt locking system with superior strength and Optima-Bore® barrels with Optimachoke® tubes. The single trigger is selective, the stock boasts a rounded rubber recoil pad, the fore-end is Schnabel.

DT10 TRIDENT

The initials "DT" are an abbreviation of "Detachable Trigger", emphasizing the efficiency and simplicity of the new trigger group release system.

687 EELL DIAMOND PIGEON SPORTING AND 682 GOLD E SPORTING

687 EELL DIAMOND PIGEON SPORTING

One of the most elegant, finely balanced and responsive double barrel shotguns in the world, the 687 EELL Diamond Pigeon 12 gauge is the epitome of luxury and performance for the competitive shooter. Beretta's extensive hand-chased engraving and highly figured select walnut set this shotgun apart from all others. Just like the field version in every luxurious detail with the added benefit of a wider rib for better target acquisition.

682 GOLD E SPORTING

Designed to be shot hard with conical locking lugs engineered to compensate for the wear of thousands of rounds, the 682 Gold E Sporting has all the features to keep you at the top of your game. The recoil shoulders are replaceable (a must for avid shooters), the palm-swell allows for a more positive grip and the Optimachoke® tubes give you smoking clay patterns. This is a beautiful shotgun, from the select walnut to the elegant engraving.

"WHEN I PURCHASED MY 682 GOLD E SPORTING I WAS VERY IMPRESSED BY THE LEVEL OF FIT AND FINISH. THE FIRST TIME I SHOT A ROUND OF SPORTING CLAYS WITH IT, I SHOT A 47 OUT OF 50. THE SECOND TIME, I SHOT 49 OUT OF 50. I AM PROUD TO SAY THAT I OWN SEVERAL BERETTA OVER-UNDERS AND THIS WON'T BE MY LAST. THE 682 GOLD E IS AN AMAZING SHOTGUN. THANK YOU, BERETTA, FOR EXCEEDING MY EXPECTATIONS."

— Jason Valiga, Beretta Customer

682 GOLD E

682 GOLD E TRAP

Whatever your target discipline, the 682 Gold E can help you dominate. For the trap shooter, you'll find the 682 Gold E Trap perfect for your passion. It features a select walnut stock in international style with rubber recoil pad and beavertail fore-end, gold non-selective single trigger, adjustable for length of pull. And the distinctive receiver engraving and inlay pattern immediately identify it as a target gun. On request, a fully adjustable stock with Memory System is available.

682 GOLD E SKEET

Special skeet stock with rounded rubber recoil pad, beavertail fore-end, tapered top rib with white front sight, non-selective adjustable single trigger and special Beretta skeet chokes characterize the gold medalist 682 Gold E skeet. This model is also available with Optima-Bore® barrels that reduce felt recoil and Optimachoke® or Extended Optimachoke® tubes ensuring consistent shot distribution and the adjustable stock with Memory System .

ADJUSTABLE STOCK WITH MEMORY SYSTEM

The adjusting device is made of carbon reinforced technopolymer guaranteeing robustness and durability.

ADJUSTABLE TRIGGER

The single trigger is adjustable for length of pull.

686 E

686 E TRAP

The 686 E have been re-designed to make them the most sought after competition over-and-unders. The modern ellipsis graphic motif on the receiver and the exclusive dual color electroless finish characterize these guns adding protection against the elements. The 686 E Trap features a select walnut stock in international style and beavertail fore-end. Flat top rib has luminous or white front sight. Gold, non-selective single trigger. It is also available with adjustable stock Memory System.

686 E SPORTING

Manufactured in 12 and 20 gauge, the 686 E Sporting offers single selective trigger, special Sporting stock and Schnabel fore-end, taperd top rib with luminous or white frot bead. The 12 gauge model is also available with Memory System adjustable stock, beavertail fore-end, single selective blocked trigger and luminous or white front sight with mid-rib bead. Mobilchoke® tubes are standard.

686E BLACK AND 686 WHITE ONYX SPORTING

686 E BLACK SPORTING

The 686 E is today produced also in the 686 E Black Sporting special series. This model features, on the receiver, the same modern ellipsis graphic motif of the original model and a new exclusive matte/glossy black finish. The technical features of 686 E Black Sporting model are the same of correspondent 686 E version.

686 WHITE ONYX SPORTING

Designed to fulfil everything shooters look for in a competition shotgun, the Beretta 686 White Onyx Sporting over-and-under proofs that you can still get brilliant results on a reasonable budget. It features a receiver machined with the Beretta distinctive Dura-Jewel pattern and a nickel-alloy finish contrasting with the satin side panels and the gold-plated trigger. The Optima-Bore® barrels reduce felt recoil and the Optimachoke® tubes guarantee a perfect shot pattern and a regular distribution of pellets.

UGB25 XCEL

UGB25 Xcel

The operating principle of the Beretta UGB25 Xcel semiautomatic gun with break-open barrel is based on short recoil, which keeps the internal parts of the gun clean even after prolonged use. The short recoil (and low barrel axis position) almost completely compensates for muzzle jump during firing, with quicker and easier realignment of the barrel on the target for the next shot. The low barrel axis position transmits the recoil forces in line with the shooter's shoulder, thus minimizing felt recoil.

Unlike conventional fixed-barrel semiautomatic shotguns, this new type of break-open design enables the shooter to immediately determine the condition of the shotgun (loaded or unloaded) while allowing others to see the gun clearly in "safe" mode with an open action.

The Beretta UGB25 Xcel features the unmistakable touch of Giugiaro Design. The ergonomically rounded back of the light alloy receiver fits smoothly into the stock, allowing quick and instinctive target acquisition. The polished sides contrast pleasingly with the other matte anti-glare surfaces. The streamlined receiver and the newly designed fore-end with its extended checkered configuration combine to give the UGB25 Xcel an extremely attractive look.

The exclusive use of special spring dampers on the barrel monobloc allows, when shooting, to dissipate in heat a part of the barrel kinetic energy, decreasing the stress for the parts and in the meantime increasing the shotgun life.

UGB25 Xcel. The single barrel offers the advantage of maintaining the point of impact of the second shot exactly in line with that of the first shot, thus ensuring excellent performance.

UGB25 XCEL

The cartridge carrier receives the second cartridge on the right-hand side of the receiver, making it immediately ready for use. It is chambered automatically through the feeding port after the first round in the cartridge chamber has been fired. The design of the cartridge carrier button and its position on the receiver ensure quick and easy removal of the cartridge on the carrier. The ejection port is in the bottom of the receiver. The ejector expells the spent hull downward, away from the shooter and nearby competitors, and is user-friendly for both right- and left-hand shooters.

The trigger plate is made entirely of high-resistance fiberglass-reinforced technopolymer and features self-lubrication of the firing mechanism, good vibration absorption and thermal stability for improved "feel" in cold weather. It is designed specifically to optimize the ergonomics.

All versions of the UGB25 Xcel come with an Optima-Bore® barrel with a lengthened forcing cone for enhanced pattern distribution sensitivity, reduced felt recoil and shot velocity optimization. The internal shape of the Beretta's Optimachoke® and Extended Optimachoke® tubes is designed to reduce shot deformation and to enhance shot pattern distribution and concentration.

Made of selected walnut with a water resistant finish, the standard stock comes with a Gel•Tek recoil absorbing pad that reduces much of the felt recoil during firing. Different size recoil pads can be mounted in a few seconds to modify the length of pull. The stock is designed to hold the Beretta Recoil Reduction System. The fore-end, which is also made of walnut, has a semi-beavertail configuration. Both feature an excellent grip thanks to the laser technology new pattern checkering.

In some versions the walnut stock is fully adjustable in terms of drop and cast, by means of the perfectioned Beretta Memory System and the recoil pad support can be adjusted to modify the length of pull and the angle of the Gel•Tek interchangeable recoil pad. The multi-adjustable stock can be equipped with the optional Beretta Recoil Reduction System inside, made of a spring mass which counteracts the backward force of the gun during firing, significantly reducing felt recoil.

MULTI ADJUSTABLE STOCK

Optional Beretta Recoil Reduction System significantly reduces felt recoil.

Team Beretta shooter Scott Robertson uses the UGB25 Xcel to trick shoot at the 2007 Grand American Trapshoot. The UGB25 Xcel was unveiled during this event.

VICTORY

AL391 STONECOAT GOLD SPORTING

AL391 STONECOAT GOLD SPORTING

With an added suite of standard features, the AL391 Stonecoat Gold becomes the ultimate autoloader for the sporting clays course. Along with its distinctively engraved Beretta logo and blue enamel inserts, every Stonecoat Gold Sporting has a recoil reducer (Recoil Reduction System) fitted in the buttstock and an interchangeable top rib. Optima-Bore® barrel and Extended Optimachoke® tubes are supplied with the 12-gauge model. Gel-tek recoil pad is standard.

Both sides of the receiver feature blue-enameled inserts that unite the receiver and buttstock in a stylistic look and distinguish it from the field model.

Stock recoil reducer is standard on 12-gauge AL391 Stonecoat Gold Sporting.

AL391 URIKA2

AL391 URIKA2 PARALLEL TARGET SL

Made for those who want perfect shooting, the AL391 Urika2 Parallel Target boasts the same improved self-cleaning gas system and receiver finish of field grade models. It comes with a Monte Carlo stock with parallel comb and reduced grip radius. This facilitates the grip and instinctive pointing, especially for individuals with smaller hands. The shotgun has all the professional characteristics of the Beretta competition semiautomatics as the stock preset to lodge the Recoil Reduction System device.

AL391 URIKA2 GOLD SPORTING

Designed especially for the Sporting discipline, the Urika2 Gold Sporting boasts a special competition sporting stock with a rounded rubber recoil pad, wide, ventilated rib with luminous red or white front sight. Optima-Bore® barrel with Extended Optimachoke® tubes. Engraved floral motifs and "gold" markings decorate the glossy side panels of the receiver. The bolt and carrier are jeweled. Stock and fore-end are made with selected walnut. The Recoil Reduction System is optional.

AL391 URIKA2 SPORTING

The Beretta improved gas system of the Urika2 makes these semiautomatics some of the softest shooting autoloaders – right out of the box – reducing felt recoil and improving second shot recovery. The adjustable drop and cast system ensures a custom fit for every shooter. The optional Recoil Reduction System device can be lodged in the X-Tra Grain stock.

Top:
AL391 Urika2 Sporting offers a fine-line scroll engraving and an X-Tra Grain wood enhancement treatment of stock and fore-end.
Right:
AL391 Urika2 Gold Sporting boasts an extended scroll engraving with "gold" markings and jeweled bolt and carrier.

THE BERETTA TEAM

Can you imagine winning the World Shotgun Championship at 16 years old? The U.S.A.'s Vincent Hancock did just that two years ago in Lonato, Italy, with an out-of-the-box Beretta DT10. He became the youngest shooter ever to win the World Championship.

Hancock joins a prestigious list of some of the most respected and talented names in the sport of competitive shooting who embody the winning spirit of Beretta. From the Olympics to regional shoot-offs, a Beretta is usually in the hands of the champion. Beretta's gallery of champions from around the world are a testament to their skill, determination and performance under pressure. Like Beretta's competition guns, they represent the epitome of their craft.

VINCENT HANCOCK
DT10 TRIDENT

In the world of international skeet shooting, Vincent Hancock of Eatonton, Georgia, has been simply dominant. At just 16 years old, he won a gold medal at his World Championship debut, becoming the youngest shooter to be crowned World Champion. In 2007, Hancock took bronze at the World Championship and won the gold medal at the Pan American Games held in Rio De Janeiro, Brazil. He also has established the World Record of 125/125 and World Record Final of 150/150.

DAN CARLISLE, DIANE SORANTINO

Member of Team Beretta and one of America's top sporting shooters and instructors, Dan is an Olympic medal winner (Bronze in Skeet at 1984 Games), World Champion and 13-time National Champion. Most recently, Dan and his Beretta DT10 won the 19th NSCA National Championships at the National Shooting Complex in San Antonio, Texas.
Team Beretta shooter Diane Sorantino recently clinched the NSCA National Championships. The current World Champion - Sporting Clays, Diane continued her winning streak using her Beretta Teknys Gold. In 2006 she was inducted into the National Sporting Clays Association Hall of Fame.

CHIARA CAINERO
DT10 TRIDENT

Chiara Cainero of Italy has dominated the skeet international competitions during year 2006. World Cup winner, silver medalist at the World Championship, she won also the gold medal at the European Campionship. In 2007, she confirmed the title of European Champion.

THE BERETTA TEAM

RICHARD FAULDS
SO5 COMPETITION

Gold medal in double trap at the Olympic Games of Sydney 2000, Richard Faulds of Great Britain is an International shooter who has been competing at the highest level since the age of 13. Already four times World FITASC Junior Champion, in 2007 he won, for the third time the Seniors gold medal at the World FITASC Championship of Konopišté (Czech Republic), confirming him as one of the very top competitors in the World. He has been a member of Team Beretta for more than ten years.

SCOTT ROBERTSON
AL391 TEKNYS GOLD

For three-time World Champion and eight-time National Champion, Scott Robertson stepping to the awards stand has almost become as much a part of his life as shooting. A gold medalist at the 2003 ESPN Great Outdoor Games and 19-time All American, Robertson of Flower Mound, Texas, has Pan-American, Caribbean Cup and Ducks Unlimited National championships among his many accomplishments.

FRANCESCO D'ANIELLO
DT10 TRIDENT

World Champion 2007 in double trap - individual and by team - at Nicosia, Cyprus, Francesco D'Aniello of Italy also ranks first in the double trap World Ranking. Gold medal at the Italian Championship 2007, during last year he won also the World Cup event of Maribor, Slovenia.

GREGG WOLF
687 EELL

As a 20-year-old college student, Gregg became the first American, the first Junior competitor, and the youngest person ever to win the World F.I.T.A.S.C Championship. A member of Team Beretta, Gregg shoots a Beretta 687EELL. In a few short years, Gregg has captured 14 World and National titles, including four World Championships as a Junior.

INTRODUCING

PISTOLS AND CARBINES

Whether testing your skills in competition, polishing them at the target range, or defending your home and family, there are certain things you demand from your firearm. Tops among these demands are absolute reliability, consistent accuracy, and optimal safety. But beyond these essential traits, your pistol or carbine is an extension of your personality. Your preference may run to the fastest or lightest or most technologically advanced. Or to the familiar standbys that still feel perfect in the palm and right on the money at the range.

As a Beretta Shooter, you can also expect innovation, versatility, and superior design and workmanship. Because in the handgun stakes, Beretta wins—hands down. The automatic choice of marksmen, sportsmen, and military worldwide, Beretta pistols and carbines carry with them their own cachet and reputation. And deservedly so. A Beretta firearm is both a triumph of design and reliable performance, offering the user the most advantageous combination of form and function.

90TWO

90TWO

The revolutionary Beretta 90two pistol introduces new improvements to form, fit and function while maintaining the integrity and reputation of its predecessor, the legendary Beretta 92/96 Series. Featuring a technopolymer removable single-piece wraparound grip in two sizes (standard and slim), increased magazine capacity, internal recoil buffer (softer shooting, less felt recoil), captive recoil spring guide assembly and quick assembly feature, the 90two has evolved to individually fit the hand of each operator, while maintaining accuracy and reliability.

The 90two comes with a large array of safety features:

90two Type F. Double/single action. Ambidextrous manual safety on the slide with hammer decocking function, automatic firing pin block safety.

90two Type G. Double/single action. Ambidextrous manual lever on the slide with hammer decocking function with the return of the lever to the firing position, automatic firing pin block safety.

90two Type D. Double action only. Without manual safety-hammer decocking. The spurless hammer, after each shot, returns to the decocked position. Automatic firing pin block safety.

THE NEXT GENERATION HAS ARRIVED.

SPECIAL HANDGUNS FOR SPECIAL TASKS

The new removable single-piece, ergonomic and modular grip unit allows for quick and easy grip replacement. The rear upper part is precisely curved and relieved for a firmer, more comfortable grip and to snugly fit the shooter's hand.

With innovative lines and rounded corners, the 90two incorporates new benefits while maintaining all the advanced performance and safety features that made the 92 pistol series an international legend. The interchangeability and modularity of the components, together with the integral accessory rail and removable grip unit make this pistol ready to meet any operational requirement.

Located forward and under the barrel for light and laser accessories, the accessory rail is machined integral to the frame. An accessory rail cover protects the rail and permits the pistol's smooth insertion into the holster.

90two with Burris Xtreme Tactical Laser Flashlight.

92FS

92FS

From the jungle heat of Panama to the sandstorms of Iraq, the U.S. Armed Forces have counted on Beretta pistols for almost two decades of distinguished service. The 92FS, Beretta's premier full metal gun, most resembles the military M9 9mm pistol. Accurate out of the box, this workhorse features an open slide design that virtually eliminates jamming, a safety system that combines decocking with a positive thumb safety, and a combat muzzle crown. Beretta's proprietary black, non-glare Bruniton finish gives your 92FS a wear-resistant coating, which means it will stand up to any special duty.

92FS INOX

The slide, barrel and many other key components of 92 FS Inox are made with stainless steel. The alloy frame is anodized to match perfecly the color and finish of inox parts. The rubber grips come with a stippled texture and hex key grip screws.

92 STEEL-I

92 STEEL-I

The Beretta Steel-I is the synthesis of the long-standing experience made with the model 92 and reconfirms Beretta's attention to steel framed semiautomatic pistols. Designed with extreme care to detail, the Steel-I is created with true connoisseurs, expert marksmen and collectors in mind. The pistol is available in calibers, in the traditional single/double action version. The exclusive Steel-I model sports numerous special features, like the frame manufactured with high resistance steel, an ergonomic vertical grip also suitable for small handed shooters, a slide widened near the slide rails, an ambidextrous frame mounted safety lever, a skeletonized hammer to reduce lock time. The Beretta Steel-I pistols are qualified to compete in the IDPA competitions.

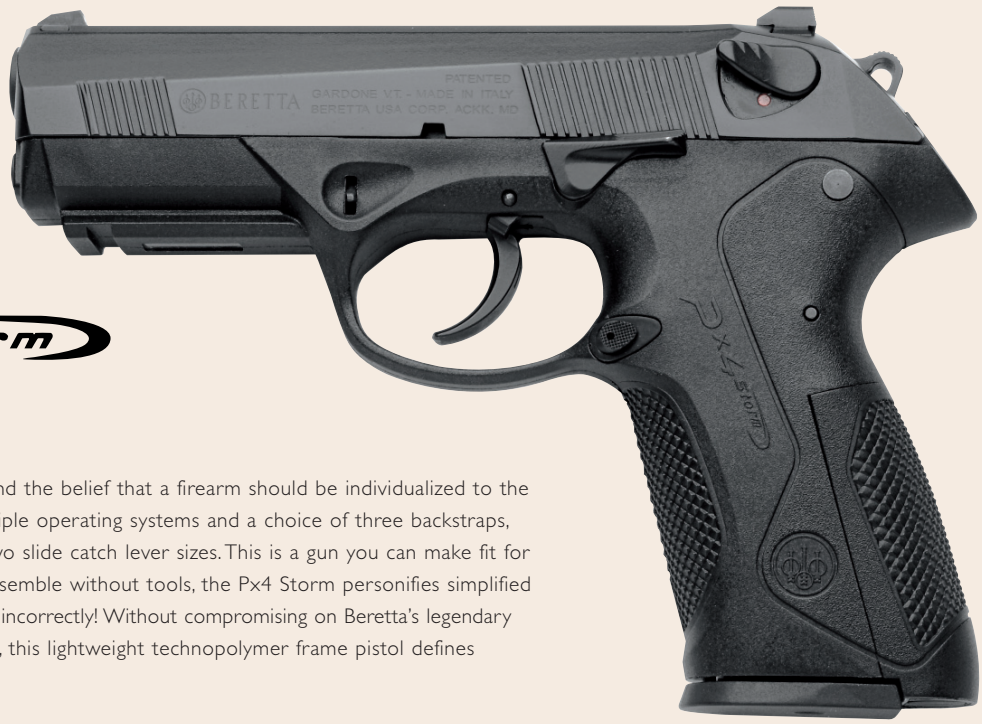

With the safety on, the 92 steel-I is in the cocked-and-locked position.

PX4 STORM

Px4 Storm

PX4 STORM

The Beretta Px4 Storm was built around the belief that a firearm should be individualized to the operator. The Px4 Storm includes multiple operating systems and a choice of three backstraps, three magazine release buttons, and two slide catch lever sizes. This is a gun you can make fit for your purposes. Extremely easy to disassemble without tools, the Px4 Storm personifies simplified field stripping: it cannot be reassembled incorrectly! Without compromising on Beretta's legendary ergonomics, reliability and performance, this lightweight technopolymer frame pistol defines *Individualized Performance*.

Interchangeable grip backstraps and multiple-sized, reversible magazine release buttons allow for customization to the individual's hand size.

In the Px4 Storm Type G model, the safety lever on the slide keeps the hammer-decocking function only. When released, it will return automatically to the firing position.

"I AM A SINGLE FEMALE (MOM) AND JUST PURCHASED MY FIRST FIREARM FOR SELF-HOME PROTECTION. AFTER CONTEMPLATING SEVERAL COMPETITORS' MODELS, I WENT WITH THE PX4 STORM, 9MM AND I AM SO GLAD THAT I DID. THE QUALITY OF BERETTA IS WHAT SOLD ME ON THE PISTOL. I ALSO LIKE THE FLEXIBILITY THE PX4 STORM OFFERS WITH DIFFERENT SIZED GRIPS TO MAKE A CUSTOM FIT TO MY HAND."

— Brenda, Beretta Customer

CUSTOMIZE TO YOUR HAND AND SHOOTING STYLE

INDIVIDUALIZED PERFORMANCE.

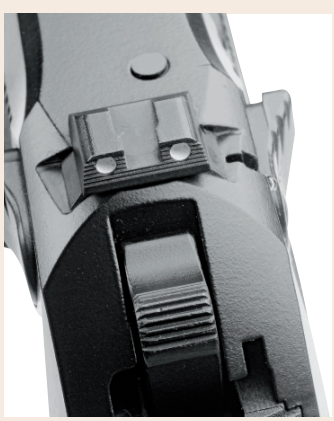

PX4 STORM .45 ACP

To those who prefer a bigger ammunition capable to deliver at first shot more stopping power, Beretta dedicates its new Px4 Storm 45 ACP, boasting the same dimensions and ergonomic advantages of the Px4 family.

PX4 STORM SD

The Px4 Storm SD is a real Special Duty pistol, chambered for the full power .45 caliber, conceived for extreme tactical use in any environmental condtions. It offers the best materials and surface treatments in order to to meet salt spray and endurance tests and mud, ice, sand and marine underwater deployment.

Standard Super-Luminova sights give high targeting performance in all types of light conditions. With minimal exposure to light (or flashlight), this luminous material is "charged" and visible in low light.

Military Standard 1913 "Picatinny" standard accessory rail. Allows mounting of optional tactical lights and laser units.

PX4 STORM SUB-COMPACT

PX4 STORM SUB-COMPACT

The Beretta Px4 Storm Sub-Compact pistol is the most advanced sub-compact sidearm of its kind. Built around Beretta's latest Px4 modular technology, the Px4 Storm Sub-Compact delivers concealed carry handling with large frame firepower.

Available in three calibers (9mm x 19, 9mm x 21 IMI and .40 S&W), the Px4 Storm Sub-Compact uses a very reliable locked breech and tilt barrel system, providing a more compact and lighter weight system. A stainless steel barrel requires less maintenance and is corrosion resistant, perfectly suited for concealment close to active, perspiring bodies.

The pistol adapts to different hand sizes easily with interchangeable backstraps (included). An ambidextrous manual safety lever is positioned on both sides of the slide for easy access by all shooters. A reversible magazine release button can be mounted on either side and can quickly be replaced by a smaller and larger size button (optional). An interchangeable slide catch can also be replaced with an optional low-profile configuration. A standard Picatinny Rail (MIL-STD-1913) allows for an array of aftermarket accessories

Patented SnapGrip™ Magazine Extender: Beretta's patented SnapGrip Magazine Extender flips down easily, maximizing the grip for larger hands.

No tools are required to replace the interchangeable backstrap and create an individualized fit for the user.

3032 TOMCAT INOX

An unobtrusive companion for the toughest streets, the 3032 Tomcat Inox offers all the features of the 21 Bobcat with the addition of a stainless steel barrel and slide. Both pistols have a snag-proof design that permits quick presentation to the target, a slide blade front sight for fast target acquisition, and a smooth, crisp trigger pull in double/single action.

21 BOBCAT

When police officers or concealed carry permit holders look for the ultimate in concealability, they look to the Beretta Bobcat in 6.35 mm (.25 Auto) and .22 Long Rifle. This double-action pistol may be tiny, but it's a reliable defensive arm. The tip-up barrel of this pocket pistol allows rounds to be loaded directly into the chamber without slide retraction. Precisely rifled for accuracy, the barrel is forged out of special high strength steel.

U22 NEOS

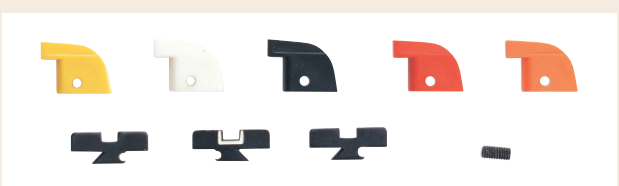

U22 NEOS

Designed for the entry-level pistol shooters, the U22 Neos is ideal for training and plinking but can be adapted to the advanced shooter's needs. Despite being richly accessorized, the Neos is on the market at an affordable price. The pistol features cutting-edge design, modular construction that allows personalization, and the flexibility for many shooting disciplines. This is a pistol that won't easily be outgrown as skills improve.

U22 NEOS DELUXE

The U22 Neos semiautomatic pistol is a single-action, 22LR caliber firearm designed and manufactured in America by Beretta USA Corp. The advanced shooter demands more control, and gets it in the U22 Neos Deluxe. The best in off-hand accuracy comes from a trigger adjustable for take-up and overtravel. Front sight posts in black, red and white match rear sight leaves outlined in the same colors. An aggressive grip molding pattern makes the grasp secure when match pressure gives even the seasoned competitor moist palms.

ACCESSORY REAR AND FRONT SIGHTS

CO_2 PISTOLS

92FS AND 92FS XX-TREME/CO_2

The 92 FS/CO_2 pistol, manufactured under Beretta license by Germany's Umarex, is operated by a CO_2 capsule lodged within the grip (capable of more than 50 shots). The pistol comes supplied with 2 magazine cartridges containing 8 shots of .177" (4.5 mm) caliber pellets.

The 92FS/CO_2 is available in a polished black or nickel-plated finish. The new 92FS XX-TREME/CO_2, equipped with barrel "compensator", boasts the Speed Dot Top Point I mounted on a specific base carryng rails for accessories. As these gun are considered to possess a "modest capacity of wounding", they are free of restrictions in terms of purchase in most countries.

A-9000S CO_2

Manufactured under Beretta license by the Russian Anics Group, the A-9000S CO_2 pistol is operated by a CO_2 capsule lodged within the grip (capable of firing up to 70 shots). The pistol boasts a patented revolutionary magazine, with conveyer-type mechanism, able to hold 22 pellets 4.5mm (.177") caliber. Any type of pellets can be used in any sequence. A-9000S maintains full functional conformity with the Beretta 9000S pistol: as the original model, it fires in double or single action; the ambidextrous manual safety, also acts as a decocking mechanism, dropping the hammer to the half-cocked position; the empty magazine can be quickly removed from the grip pushing the release button. The pistol comes supplied with a spare magazine.

CX4 STORM

CX4 STORM

Accurate, easy to use, field strip and accessorize, the Cx4 Storm fits every need of the American pistol shooter. Today's shooter demands a gun that can accept a large assortment of accessories, and the Cx4 caters to all tastes. A retractable accessory rail extends from the fore-end for mounting tactical lights. Rails can be installed on either side or the bottom of the fore-end for lasers or forward grips. Redefining the pistol-caliber carbine, with racy and radical lines from the masters of industrial design at Giugiaro. The Cx4 Storm's smooth, sweeping curves are made possible by the use of modern high-strength, lightweight technopolymers.

Retractable fore-end rail for mounting of optional tactical lights and laser units.

Adjustable pull length to fit your specifications with supplied spacer. Two more spacers may be added and removed.

BURRIS SPEEDDOT 135

Waterproof, fogproof sight delivers a crisp, perfectly round, bright, adjustable brightness dot.

RX4 STORM

RX4 STORM RIFLE

The Beretta Rx4 Storm is the most advanced semiautomatic rifle ever designed for commercial and law enforcement use. This .223 special purpose rifle emphasizes individual performance with multiple stock configurations, ergonomic adjustment and ambidextrous controls. Designed in a joint effort by Beretta and Benelli engineers, the Rx4 Storm incorporates the most advanced technology in firearms. Using the ARGO (Auto Regulating Gas Operating) system, the gas port is located just forward of the chamber where the gases are hotter and cleaner, resulting in less fouling and more reliable cycling.

Built to the highest industry standards, the Rx4 Storm employs 223 ammunition and is totally reliable in every condition of use.

Ambidextrous magazine release button and bolt release lever. Manual safety button can be assembled on either side.

A LONG LIST OF ACCESSORIES

Rx4 Storm can be equipped with a long list of accessories such as Picatinny rails, tactical sight systems, illuminators, laser aiming devices, front handles, high capacity magazines, Nato Standard magazines, slings, etc.

THE MOST ADVANCED RIFLE
EVER DESIGNED.

A front sight post, protected by "ears" and a fully adjustable aperture sight are standard. Up to 5 Picatinny rails on request.

Optional front handle attached to the Picatinny rail.

The telescopic stock is fitted with a rubber recoil pad. The overall dimensions of the gun can be reduced by about 12 cm / 4.7".

STURDY AND PRACTICAL

In order to make stripping easier and to allow easy interchangeability of the barrels, the frame of the Rx4 Storm is divided in 2 parts: lower receiver and upper receiver. The lower receiver is milled from a solid bar stock of aircraft grade light alloy; for maximum strength, the upper receiver (permanently affixed to the barrel) is machined from a bar of high quality hardened steel.

INTRODUCING
WESTERN GUNS

The cowboy mystique lives on. From the prairies of Nebraska to the deserts of New Mexico, it runs through the veins of those who treasure tradition and revel in glories past. The spin of the cylinder, the glint of the nickel barrel, the sheer thrill of breaking open a six-shooter or the adrenaline rush of firing a fast handling, lever-action rifle. There's nothing that quite compares to that exhilaration. But more than anywhere else, the heritage of the Old West runs deep in the heart of the Western Shooter. And finds its fulfillment in that moment when you test yourself, using those classic firearms that defined a fabled era, against the legends of the American frontier.

Authenticity and performance is what matters above everything else to the Western Shooter. This is why you'll find an extraordinary combination of both in Beretta's lineup of Old West firearms. These fine firearms are for the Western Shooter who demands absolute truthfulness to the 19th century originals as far as dimensions, feel and functioning, coupled with Beretta-style reliability, safety and performance.

1873 RENEGADE, STAMPEDE BUNTLINE

1873 RENEGADE SHORT RIFLE

In 1873, Oliver Winchester introduced his new steel-framed lever-action rifle, creating what would eventually be known as the "Gun That Won the West." The Model 1873 was originally chambered in a new, more powerful cartridge, the .44/40—a .44 caliber bullet propelled by 40 grains of black powder. However, one big factor that really ensured the success of the 1873 was that Colt quickly responded by offering its frontier six-shooter chambered in .44/40. A cowboy could have both a lever-action rifle and his "Peacemaker" and need only one cartridge belt. Today, the 1873 is the most popular rifle used in cowboy action shooting.

Beretta's new 1873 Renegade takes this popular design to the next level as the first factory-produced 1873 rifle with a shorter action stroke length, straight butt plate and gold bead front sight—"race ready" right out of the box! Available in .45 LC and .357 Mag.

STAMPEDE BUNTLINE CARBINE

In 1873, it is said that dime novelist Ned Buntline presented Colt revolvers with shoulder stocks to the most famous men of the Old West, including lawmen Wyatt Earp and Bat Masterson. The Buntline revolver was one of the first reliable repeating rifles, battle-tested in the Mexican War as well as Indian Wars of the Southwest.

The new Beretta Stampede Buntline revolver is a true working replica of the famous Buntline, featuring the same great performance and reliability as Beretta Stampede revolvers, including the innovative transfer bar safety, which allows the revolver to be safely loaded with six cartridges rather than five and an open chamber. Hooked trigger guard, 18-inch barrel, brass crescent butt plate, checkered stock, inlaid gold Beretta medallion on both sides.

GOLD RUSH

GOLD RUSH RIFLE

The Beretta Gold Rush Rifle follows the same philosophy as our successful Stampede revolver: combining the looks and feel of the Old West original with modern safety and reliability. Chambered for the 45LC and the 357 Mag/38 Special, the Gold Rush is a fast-handling pump-action longarm perfect for Cowboy Action Shooting, small-game hunting and informal target practice. Discrete modifications have been incorporated that greatly enhance safety and reliability.

GOLD RUSH CARBINE

Like the Gold Rush Rifle, the Gold Rush Carbine is a testament to authenticity coupled with modern performance. Compared to the original, several enhancements have been made. A solid transfer-bar safety mechanism is housed in the hammer, making the gun absolutely safe to load and unload without having to lower the hammer. Feeding is improved considerably by ensuring that each cartridge is perfectly in line with the chamber. And a redesigned cycling mechanism makes it possible to obtain the desired speeds without jams.

GOLD RUSH DELUXE

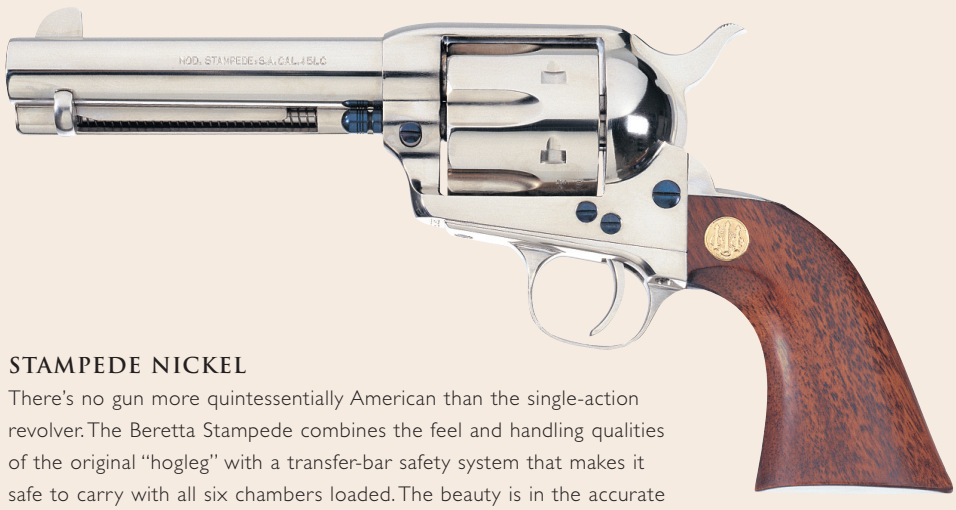

The Beretta Gold Rush Deluxe Rifle and Carbine exemplify the same high standards in engineering and performance as the Beretta Gold Rush and Carbine, with some important aesthetic differences. Features of the Gold Rush Deluxe include charcoal-blued barrels, jeweled hammer and trigger and German silver medallion inlaid into the stock. The Deluxe walnut stock and fore-end have special fish-scale checkering, oil finish and Beretta "three-arrow" logo engraved in the checkering pattern.

STAMPEDE

"I STARTED SHOOTING WITH A COMPETITOR'S SIX GUN. I HAD A HARD TIME KEEPING THE SAME SIGHT PICTURE EVERY TIME I DREW IT FROM MY HOLSTER. SO I TURNED IT IN AND BOUGHT TWO BERETTA STAMPEDES. THEY WERE DEAD ACCURATE RIGHT OUT OF THE BOX. THE GRIPS WERE THIN AND FIT BETTER IN MY HANDS. I HAVE NOT HAD ANY PROBLEMS WITH THEM AND THEY LOOK GREAT. I LOVE SHOOTING THEM."

— Robert, Beretta Customer

STAMPEDE NICKEL

There's no gun more quintessentially American than the single-action revolver. The Beretta Stampede combines the feel and handling qualities of the original "hogleg" with a transfer-bar safety system that makes it safe to carry with all six chambers loaded. The beauty is in the accurate details. The fixed front sight is true to the original. And with the frame dimensions closely matched to the 19th-century originals, the Stampede feels slender and very responsive in the hand.

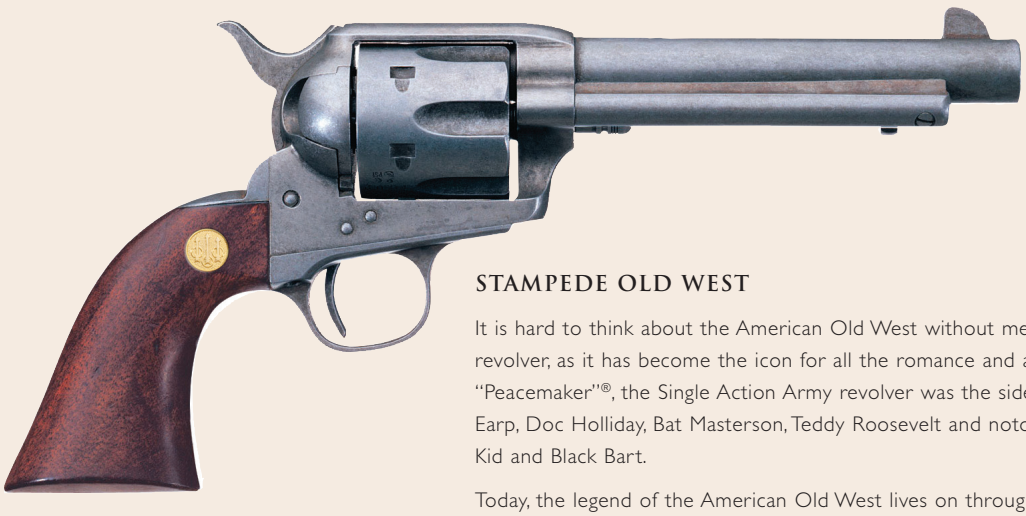

STAMPEDE DELUXE

The Stampede Deluxe features a frame finished in Beretta Color-Case, which duplicates the classic look of color-casehardening to capture the romance of the Old West. Select walnut grips and a lustrous charcoal-blued barrel and cylinder complete the picture. Whatever your choice, the transfer-bar safety system will allow you to safely load all six chambers without fearing an accidental discharge.

STAMPEDE

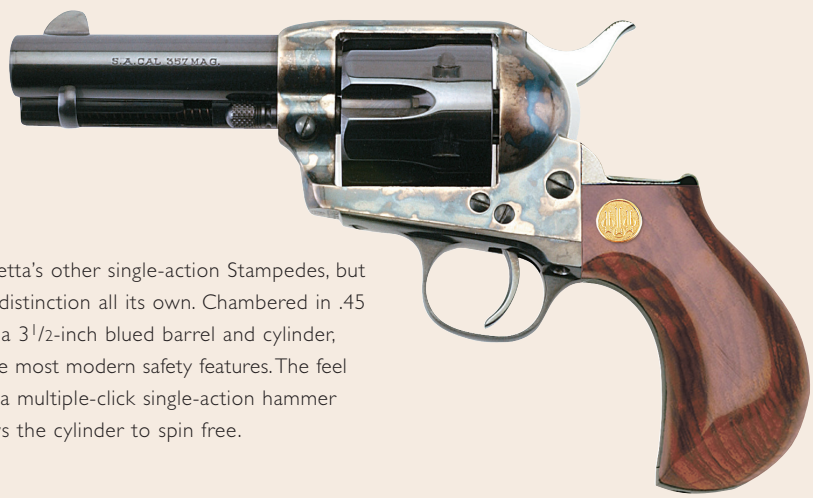

STAMPEDE OLD WEST

It is hard to think about the American Old West without mentioning the Colt Single Action Army revolver, as it has become the icon for all the romance and adventure of the Old West. Often called the "Peacemaker"®, the Single Action Army revolver was the sidearm of choice for legendary figures like Wyatt Earp, Doc Holliday, Bat Masterson, Teddy Roosevelt and notorious outlaws including the Daltons, Billy the Kid and Black Bart.

Today, the legend of the American Old West lives on through the Beretta Stampede Single Action revolver. From the multiple clicks of the hammer to the feel of the grip, the Stampede is true in every detail, bridging Old West authenticity with Beretta's reliability, safety and performance.

STAMPEDE MARSHALL

The internal features may be the same as Beretta's other single-action Stampedes, but the walnut birdhead grip gives the Marshall a distinction all its own. Chambered in .45 Colt and .357 Mag, this handsome replica has a 3 1/2-inch blued barrel and cylinder, Beretta Color-Case frame and incorporates the most modern safety features. The feel and functioning are just like the originals, with a multiple-click single-action hammer mechanism and a half-cock position that allows the cylinder to spin free.

STAMPEDE

STAMPEDE PHILADELPHIA CUSTOM ENGRAVED MATCHED PAIR

Any cowboy would be proud to fill his holster with these matching Stampedes. Inspired by the limited edition Philadelphia Centennial engraving (1876), this matched pair is laser-engraved then hand-finished on the receiver cylinder and barrel. The walnut grips feature checkering and inlaid gold Beretta medallions. Gold-filled "1" and "2" on top of backstrap; paired serial numbers; 5½-inch barrels. Caliber: .45 LC.

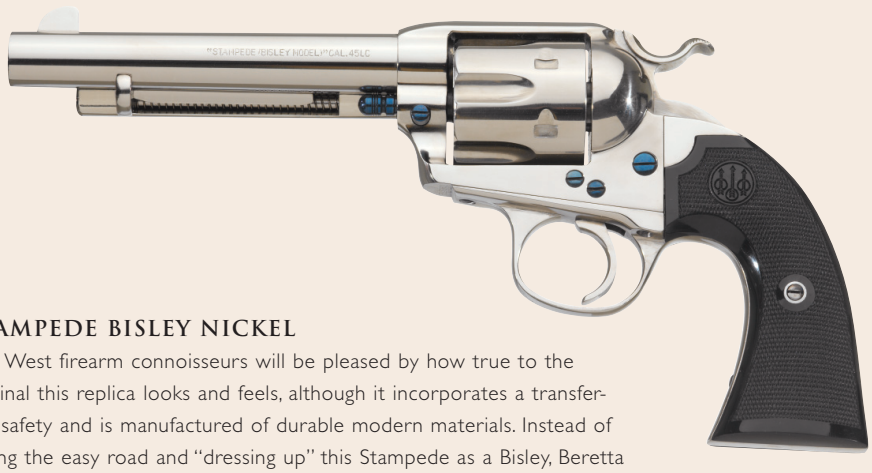

STAMPEDE GEMINI, MATCHED PAIR

This handsome matching pair of Stampedes features German silver trigger guards and backstraps. The wood grips are hand-rubbed, oil finished and fitted with a gold Beretta medallion. In addition to matching paired serial numbers, Beretta has stamped the "UGB" inspector cartouche on the outside panel of each grip. These stamps match the side of the serial number prefix. 5½-inch barrels. Caliber: .45 LC.

STAMPEDE, LARAMIE NICKEL

STAMPEDE BISLEY NICKEL

Old West firearm connoisseurs will be pleased by how true to the original this replica looks and feels, although it incorporates a transfer-bar safety and is manufactured of durable modern materials. Instead of taking the easy road and "dressing up" this Stampede as a Bisley, Beretta built this revolver from the ground up around a true Bisley frame — which is somewhat taller than that on its standard single-action cousin. The distinctive Bisley grips in imitation Bakelite, hammer and wide trigger are also a precise replica of the originals as far as dimensions, balance and feel.

STAMPEDE BISLEY NICKEL

CALIBER	45LC, 357 MAG

GRIPS	IMITATION BAKELITE		
CAPACITY	6 ROUNDS		
FINISH	NICKEL		

LARAMIE NICKEL

The Laramie replicates a break-open revolver popular in the Old West for its quality, accuracy and for the speed at which it could be loaded and unloaded. Upon releasing the top latch located in front of the hammer, the revolver could be instantly unloaded by "breaking it open," thus allowing all six empty shells to fly out of the cylinder. Beretta has improved upon the 19th-century original by reinforcing the top latch, thus making the revolver much more durable and ensuring you years and years of trouble-free enjoyment.

LARAMIE NICKEL

CALIBER	45LC, 38 SP

An accurate reproduction, we made the Laramie considerably safer by designing a rebounding-hammer/hammer-block system that allows you to safely carry it with all six chambers loaded.

INTRODUCING

THE 1526 COLLECTION

The sheer beauty is in every luxurious detail. From the rich baroque spirals hand chiseled by Master Engravers to the extraordinary cut of cloth and harmonious stitching found in the world's finest Italian apparel. Here there are no compromises; here only the very best will do. Every shotgun is created of hand-selected wood, hand engraved and hand fitted. Every article of clothing is fashioned from only the finest fabric in impeccable Italian design.

The 1526 Client is the collection that defines Beretta. That represents living at its very best. Not only is this the collection that the Beretta family is most hands-on involved with, this is the lifestyle the Berettas themselves live. This is their legacy; this is their passion. There is, quite simply, no finer example of Beretta's heritage of unflagging dedication to extraordinary performance and outstanding quality than in this collection, which is enveloped in the Italian sense of craftsmanship and style unrivaled worldwide.

THE 1526 COLLECTION

SO10 EELL

SO10 EELL

Seventy years after the first modern Beretta over-and-under (the S1 launched in 1933), a new true sidelock shotgun is born: the SO10 EELL over-and-under. It is the deserving successor of the famous Beretta SO series hunting and competition shotguns that have earned their reputation, on the Olympic podium and on the most exclusive hunts in the world, from Europe to America to Africa, for being the most functional, elegant and exclusive over-and-unders in the world. Drawing from this very long experience, and under the dedicated guidance of the Beretta family, the most gifted designers and gunsmiths of the company have created the new SO10 EELL, a synthesis of aesthetic refinement, function and performance that place it at the peak of the world's prestigious over-and-under offerings.

In Italian, EL stands for extra lusso (extra luxury). The prized double "E" double "L" designation takes that quality to the highest level of luxury.

Master Engraver Mario Terzi.

ELEGANCE AND CARE

Entirely hand executed by expert craftsmen, the Beretta SO10 EELL over-and-under case is made of solid wood covered in resistant leather. A full range of handmade cleaning and maintenance accessories is provided. Type and color of leather, wood, finishing and accessories vary depending on the model.

IMPERIALE MONTECARLO

IMPERIALE MONTECARLO

A shining example of what can be achieved when free reign is given to Master Gunsmiths in the crafting of personalized luxurious shotguns and when Master Engravers are able to express their artistry in full, the Imperiale Montecarlo is a masterpiece destined to become a part of gunmaking history. The deeply blued Demibloc barrels of the Imperiale Montecarlo side-by-side boast numerous, exclusive qualities that have determined its fame as a great hunting and competition gun. They begin with the special steel that assures extremely high resistance and outstanding tensile strength and conclude with the exclusive cold blueing of the barrels that give them an extraordinary deep glossy black color. The final result will astonish even the most refined connoisseur.

THE ART OF ENGRAVING

English scrollwork, hunting scenes, floral motifs, deep relief, mixed technique engravings, portraits and more. Any type of engraving is possible on an Imperiale Montecarlo and is executed only by the most expert Master Engravers.

THE 1526 COLLECTION

SO6 EELL, SO5

SO6 EELL

Embellished with the finest hand engraving proudly signed by the author, the SO6 EELL Premium Grade sidelock shotgun is sought after by connoisseurs who desire to be one of the few to own such a masterpiece. Pick one up and you know it is special—each of its elegant details, from the sophisticated engravings to the gold-inlaid animals to the dimensions of the walnut briar stock and receiver, is executed to suit the personal tastes and requirements of its owner. The Master Gunsmiths' handwork is evident everywhere, from the hand-cut deep diamond checkering to the hand-file cut ventilated rib. Prized for their beauty and uniqueness, each SO6 EELL is built to perform to the highest standards decade after decade, generation after generation.

SO5

With numerous gold medals in the Olympics and other prestigious international competitions, the best shooters in the world consider the SO5 over-and-under the finest competition shotgun ever made. The SO5 is handcrafted to meet the requirements of every shooting discipline and can be further personalized for peak performance. This elegant champion's sleek profile enhances swing and pointability. Its sideplates are beautifully hand engraved and the trigger plate is embellished with a 24-carat fine gold inlay of the "P. Beretta" signature on the coin silver finish.

DT10 TRIDENT EELL, L

DT10 TRIDENT EELL

Competitors feel a special admiration for the shotgun that accompanies them to the podium. Since the beginning of international competition, Beretta has accompanied more medalists than any other brand of shotgun. The DT10 Trident EELL over-and-under was developed for discerning shooters, rolling performance and elegance into a truly durable, secure investment. The perfectly coupled components and the elegant, fully engraved, hand-finished receiver put this shotgun into the exclusive category of a Beretta Premium Grade.

DT10 TRIDENT L

Available with a fine English scroll or with a floral motif engraving with birds on the side panels, this model shows the same attention in the manual working of the whole gun and the same methodical care already reserved to the DT10 Trident EELL.

THE 1526 COLLECTION

GIUBILEO SERIES, 687 EELL CLASSIC

GIUBILEO

The splendid Giubileo over-and-under, made in 12, 20, 28 and .410-gauge models, is distinguished by rich, baroque spiral and floral engravings on the receiver and sideplates, and by its exquisitely proportioned construction. There are no screws on the plates, allowing the Master Engravers to express their artistry in full, while the internal surfaces and mechanisms are impeccably polished. The elongated trigger guard, the safety and top lever are also completely engraved. The stock and fore-end, made from the highest quality walnut, are finely checkered.

GIUBILEO II

Almost five centuries of tradition have produced the elegant lines, rich engravings, innovative technology and superior durability of the side-by-side Giubileo II, masterfully crafted in 12 and 20 gauge. The receiver features side panels that cleverly hide hinges and hinge pins and are applied without screws. The top moldings of the receiver, coined in relief, make this wonderful side-by-side even more slender and elegant. The extended trigger guard, wisely encased within the grip, and the oriented screws immediately show Beretta's care and attention to the finer details.

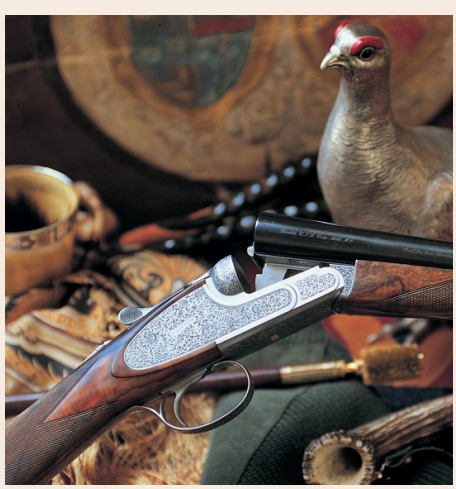

687 EELL CLASSIC

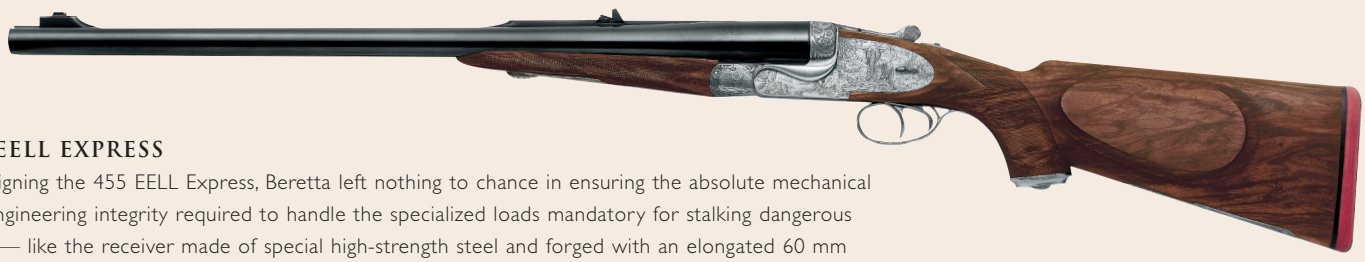

Refined pleasures are the rewards of life. One of these rewards is hunting with a prestigious Beretta shotgun like the incomparable 687 EELL Classic. The full side plates boast a fine engraving with birds and are enhanced by intricately detailed ornamental motifs of branches, leaves and flowers which extend to the trigger plate, trigger guard and fore-end iron lever.

455 EXPRESS AND SS06 EXPRESS

455 EELL EXPRESS

In designing the 455 EELL Express, Beretta left nothing to chance in ensuring the absolute mechanical and engineering integrity required to handle the specialized loads mandatory for stalking dangerous game — like the receiver made of special high-strength steel and forged with an elongated 60 mm plate to compensate for stress when shooting. Or the reinforced receiver sides that can withstand the tremendous pressure of high-powered cartridges. With the highly detailed game scene engraving and intricate scrolling, this makes for one superbly finished rifle.

SS06 EELL EXPRESS

For dedicated big game hunters worldwide, a Beretta SSO6 EELL Express rifle in the hand means a trophy on the wall. This is no ordinary firearm. The SSO6 Express EELL delivers a potent combination of ultra-strong receiver and carefully crafted barrels to comfortably handle today's powerful ballistics with remarkable accuracy. Hand-finished, hand-checkered stocks and fore-ends from highly selected walnut and a color-casehardened receiver sporting 24-carat gold inlaid animals add masterful touches to this magnificent rifle. Hand engraved hunting scenes, on request.
